Managed Video Conferencing Generation 2 (MVC G2)

HD-quality video conferences independent of device and manufacturer.

Video conferences enable efficient collaboration across locations. Relocate direct interactions with employees, customers and partners to a virtual meeting room, and boost the flexibility within your company. HD quality gives you the feeling that you are sitting directly face-to-face with the person you are talking to.

What is Managed Video Conferencing?

This video conferencing solution differs significantly from other solutions. It is an end-to-end Managed Service from the cloud, independent of manufacturer. Conferences can be held on TelePresence systems, as well as on smartphones, tablets, PCs (simply via WebRTC, without installing software) or by telephone. In pin-sharp image quality with High Definition (HD), and superb sound quality. In addition, you can label the interface according to your CD/CI specifications (logo, colours, etc.) and use your own video domains.
