

# Work Smart Workshop

## The first step towards modern working methods

Companies in every sector face new challenges: digitisation is changing the way we communicate and work together. Innovative working methods are in demand. In the workshop, you will discover what opportunities are available for your company and, together with the workshop leader, you will work out how much added value your company can gain from modern communication and collaboration solutions.

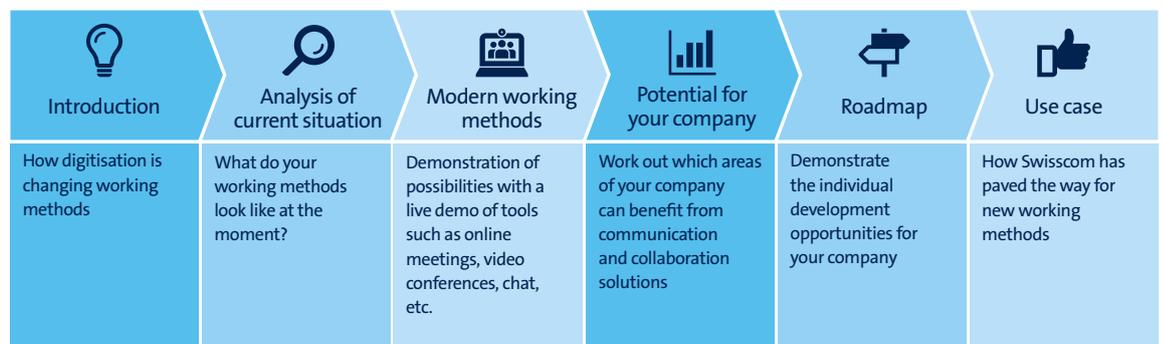

### Target group

The workshop is aimed at companies with around 100 or more employees. It is relevant to the following roles within the company: company representatives (marketing, sales, HR, etc.), financial representatives, ICT representatives and CXOs.

### Objectives

- > You understand what modern working means and the opportunities it creates.
- > You discover the added value that modern working methods can give your company.
- > Together with our expert, you develop an initial roadmap showing how your company can introduce modern working methods.

### Process

### Date

After you have registered without obligation, the workshop leader will telephone you to arrange a date.

### Duration

The workshop lasts approx. 2 hours.

### Venue

The workshop is held on your company premises by arrangement.

### Cost

The workshop is free.
