

Dynamic storage enables the secure outsourcing of your corporate data. Dynamic Storage is a Managed Service from Dynamic Computing Services (DCS). You can obtain storage space within minutes and in any quantity, entirely in line with your current requirements. Dynamic storage from Swisscom is always secure and highly available and provided from Switzerland.

Secure, highly available and automatically scaling storage space for your corporate data.

What is Dynamic Storage?

Dynamic storage is a managed service within the framework of Dynamic Computing Services (DCS) and makes the ideal addition to an existing storage portfolio, for example for georedundant expansion of your local storage. It is suitable for storing large amounts of data for which storage space must be made available quickly and variably (e.g. backup and restore data, for data archiving or simply as an extension of local storage). The virtual memory is also a good option for disaster recovery solutions.

Flexible Scaling

You can scale the highly available storage space dynamically according to your needs. What's more, you only pay for what you actually use.

Your benefit with Dynamic Storage

- **Flexibility**
Storage space as required to match to your dynamic business developments.
- **Procurement**
Available fully integrated into DCS.
- **Cost**
Lifecycle costs are eliminated, and your IT budget is protected thanks to pay-as-you-go billing.
- **Security**
Your data is stored in encrypted form and mirrored georedundantly across several computer centers in Switzerland.
- **Transparency**
You have control at all times over who uses which resources.

Agility

Self-Service in order to provide and configure IT resources quickly.

Costs

Reduce costs (TCO) and make costs variable.

Requirements

Increase service level (SLA). Increase security. Address business continuity.

Bottlenecks

Relieve your internal IT department. Retain control. Reduce complexity, make up for missing skills.

Life Cycle

Replace the data centre and IT infrastructure.

Facts & Figures

The information in this document does not constitute a binding offer. It is subject to revision at any time.

Swisscom (Switzerland) Ltd Enterprise Customers, P.O. Box, CH-3050 Berne, Telephone 0800 800 900, www.swisscom.ch/enterprise

swisscom

Basic services

“Pay as you go” service procurement and cost control

You pay only for the resources that you need. An integrated billing report enables you to control costs at all times.

Security

Certified in accordance with ISO 20000, 27001, 9001, 14001, ISAE 3402 and GDPR (data processor). Operated by Swisscom employees at four Swisscom computer centers. Data is stored in Switzerland.

Scaling

Scaling from gigabyte to petabyte, usage-based storage costs (pay per GB).

Applications

External data storage (backup/restore, archiving, extended storage, disaster recovery storage).

API access

Complete control of virtual servers and the environment from outside via API/script access.

Multilingual support in four languages

L1 support is provided in four languages (EN, DE, FR and IT) according to availability.

Free DCS training

We want to make it as easy as possible for you to get started. Attend our regular free Dynamic Computing Services training courses.

Access

DCS portal

Order conveniently via the DCS portal.

API

API based on REST: S3-compatible API.

Technology

S3 object storage.

SLA

Advanced: Business-critical applications

Business continuity ensures that reserved IT resources are available at a second Swisscom computer center (including data mirroring).

(Max. downtime: 1hr; “fulltime” support, Mon.-Sun., hr; RTO <4hrs, RPO ~ 0)
