

## **Your website must be transferred into the new version of the HomepageTool.**

A few weeks ago, all websites based on the previous HomepageTool were transferred into the new HomepageTool version 6.1.3 **without any data being lost**. We wrote to you about this several times last year.

### **Transfer in 5 steps**

Your previously published website is currently deactivated and is no longer accessible to the public. You can republish it in just a few minutes. To do this, you need to take the following steps:

1. **Log in** with your Swisscom login [here](#).
2. Launch the application “**HomepageTool/Webhosting**”.
3. Click on “**Launch HomepageTool**” and **choose a new design** for your website. If necessary, you can edit your website’s content. You can find instructions [here](#).
4. **Click on “Publish”** in the top right-hand corner of the Tool.
5. You’ve finished!

### **Important information**

Online shops, guest books and blog content cannot be transferred into the new version and must be recreated.

### **Contact**

We are here for you. If you need help, our team of experts can be contacted on the freephone number 0800 888 500 or at [webhosting.admin@swisscom.com](mailto:webhosting.admin@swisscom.com).
