

Successful switch to All IP

How to reap the benefits of modern communication with the Swisscom IP products

The switch to uniform transmission of voice, video and data over the Internet Protocol, short All IP, is a global trend. Swisscom plans to complete the transition to All IP by the end of 2017. By making this switch, we are ensuring that we will be able to continue offering you the best service in the future. Addressing the issue of All IP offers businesses and organisations a huge opportunity to critically assess their existing communications infrastructure and replace it with state-of-the-art IP technologies.

The switch to IP ideally satisfies the needs of a modern working environment:

- > The use of shared desk, mobile office and home office solutions enables greater flexibility
- > Increased efficiency due to the simplified exchange of information, as all devices speak 'IP'

Every day, developers around the world are creating new opportunities to increase the productivity of businesses and organisations through efficient communications.

The future is unpredictable, but one thing is already certain today: It speaks IP!

Your advantages with All IP

Reduce costs and control them better. Thanks to the centralisation of your equipment, you can optimise telephone and overall operating costs.

Increase efficiency, reduce complexity

The communication and collaboration within your company and with your partners is simplified.

Everywhere and anytime, with every device

Your employees can work and communicate from anywhere on any device – without limitations.
