

Full Service Solution with Smart Business Connect.

The no-worries package for your business communication.

swisscom

Use rather than invest.

With Full Service Solution, you can use a private branch exchange (PBX) with end devices for voice and data communication and pay a clearly budgetable monthly service charge. You can also use a cloud-based PBX in a secure Swisscom data centre in Switzerland, without a physical PBX at your premises. You will benefit from comprehensive customer service and you won't need to worry about depreciation and updating your systems. Your communications infrastructure will always meet the latest technical standards.

More liquidity

> No investment in your own infrastructure, lease rather than buy.

More security

> No technology risk, your solution is always state of the art.
> No surprises, with budgetable monthly costs.

More flexibility

> No standing still, your solution can be adapted to your requirements.

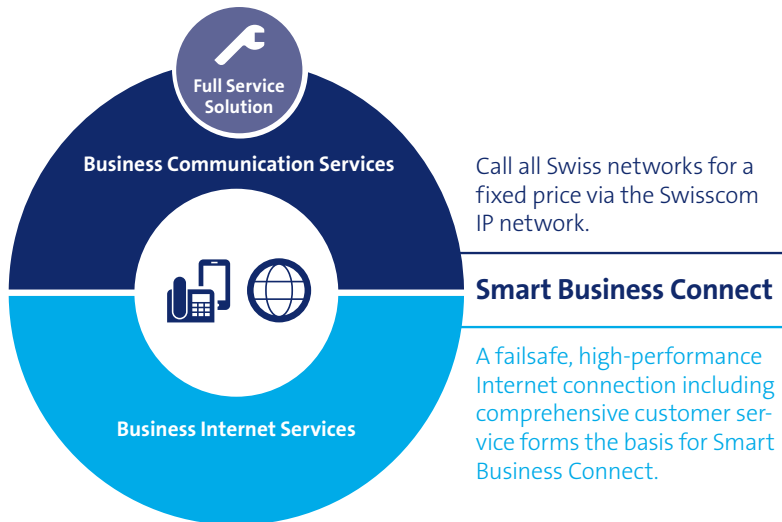

More service

> No stress thanks to no-worries operation and maintenance package.

Combine FSS with Smart Business Connect.

In combination with Smart Business Connect, depending on the tariff model you choose, you can make calls for a fixed rate and therefore benefit from a fully budgetable communications solution.

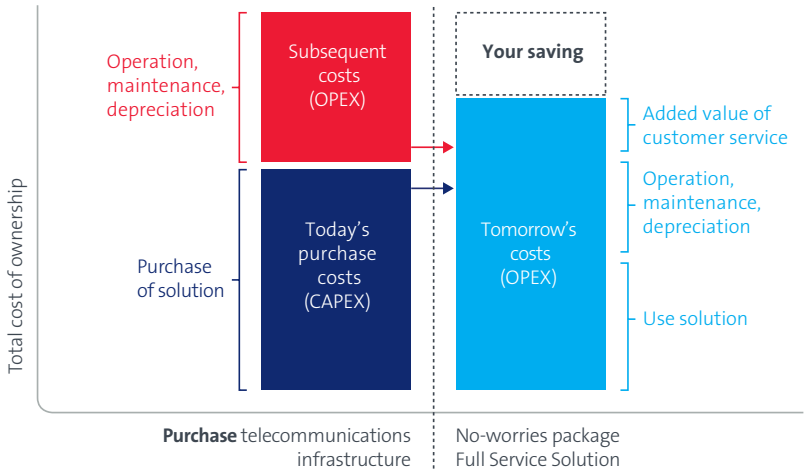

SME benefit

If you combine Full Service Solution with Smart Business Connect, you'll get a 10% discount on monthly FSS charges. With Smart Business Connect, we'll also give you a 15% SME discount on all inOne SME mobile subscriptions in your company.

Benefit rather than invest.

The cost comparison proves it:

Full Service Solution is beneficial not only in financial terms, but also in relation to efficiency and productivity – for we will provide you with an infrastructure that will speed up your communication processes and help you work as efficiently as possible.

The three main benefits.

These are the three main benefits of the Full Service Solution (FSS) no-worries package, combined with Smart Business Connect:

Costs

You get full cost certainty and budgetability because you only pay a fixed monthly fee for a complete communications solution, including calls to all Swiss networks, without having to invest in any infrastructure. You can invest where it's worth investing: in your core business.

Flexibility

You can flexibly adapt your infrastructure and phone number allocation as your requirements change: new company sites can easily be integrated and voice channels can be simply added or removed.* Your company is fully prepared for the future.

Service

You don't need to worry about your telecommunications solution. With Full Service Solution, you get a no-worries package that includes advice and installation, as well as operation and maintenance. Swisscom also ensures that the solution always meets the latest technical standards.

* For example, if a company has ten phone numbers with four voice channels, four phone calls can be made at the same time.

Full Service Solution offers you a tailor-made, comprehensive communications solution that requires no investment and makes collaboration within your company easier.
