

# Enterprise Cloud for SAP Solutions

The turbo for the digitisation of your SAP landscape

Do you use SAP and are currently in the middle of digitisation? Ever-shorter decision-making processes force you to make your SAP landscape flexible. And you need to do this without compromising stability, security or compliance.

With the Enterprise Cloud for SAP Solutions, Swisscom offers, in Switzerland, flexible infrastructure from the cloud, dedicated to SAP, reliable, SAP-certified and auditable.

### The Enterprise Cloud for SAP Solutions

This is a virtual private cloud that offers infrastructure for SAP HANA and SAP Classic as a service – automated, dynamic and highly available. You control your instances via a self-service portal and manage your servers from the test system to the highly secured productive system at the touch of a button and with invoicing that reflects your requirements.

Useful managed services intended for efficient SAP operation simplify your daily business.

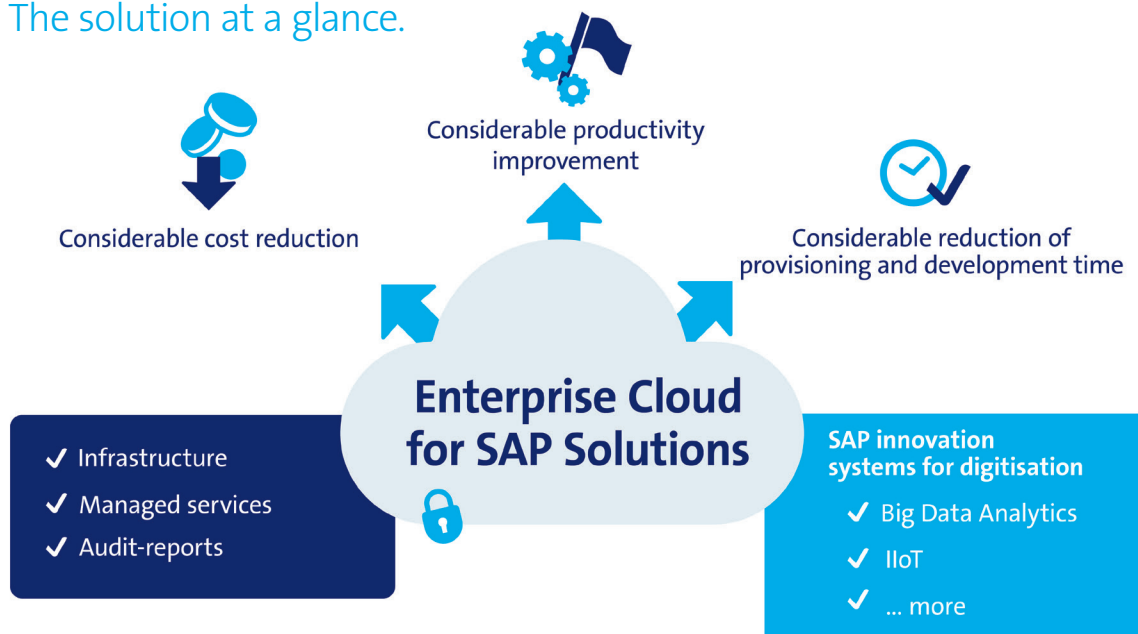

### How you benefit

Enterprise Cloud for SAP Solutions

- > shorten the period needed for set-up and expansion of infrastructure by days or even weeks
- > reduce costs by up to 30% thanks to “pay for what you use”
- > simplify both traditional SAP operation and the switch to S/4HANA
- > offer service levels up to 99.9% including securing against IT disasters
- > are run in two Tier-IV data centres in Switzerland
- > are SAP-certified and ISAE-auditable
- > support provided with useful managed services such as back-up or server operation services according to the SAP standard.

The Swisscom solution also supports the operation of SAP-related peripheral systems, making it a “one for all” solution that focuses on SAP.

The solution at a glance.
