

# Connected Workplace Service

Your virtual workplace is there where you are.

The requirements in terms of the flexibility or electronic workplaces are increasing rapidly. There is a rising need to be independent of end devices and to cope with load peaks. Swisscom has the ideal solution for your employees with high individuality requirements.

The Connected Workplace Service allows your employees to access their familiar Windows environment quickly and securely from anywhere.

## What is the Connected Workplace Service?

Connected Workplace Service is a holistic management solution that virtualises individual applications or an entire workstation in the protected Swisscom Data Center. This means that virtual workstations can be set up in an individual and flexible manner in a cloud that is tailored to your needs and can be activated in the shortest of times. The service enables the virtualisation of any desktop operating system environment – from fixed, unchangeable ones to

ones with a completely individualised functional scope.

## Your benefits

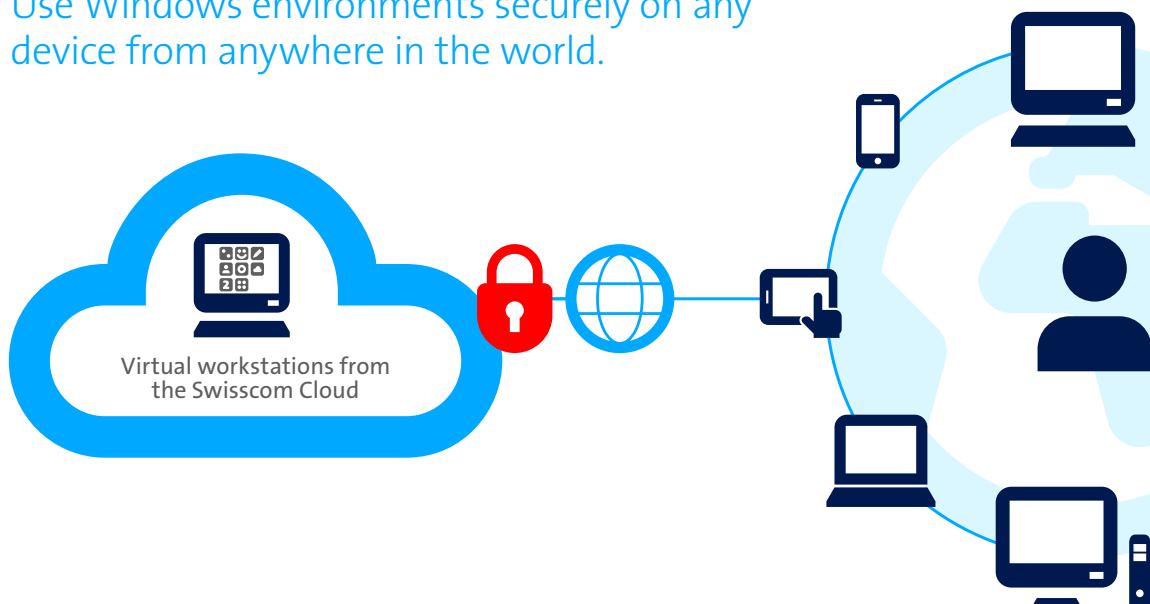

With Connected Workplace Service

- > you can access company applications and data independently of which device you are using from anywhere in the world
- > Swisscom installs a new, virtual workstation for you, thereby reducing your rollout expenses to a minimum
- > you avoid having to invest in your own infrastructure
- > you benefit from stable operation of the user environment and applications as well as the highest levels of availability thanks to data storage in the Swisscom Data Center

In addition, the Mobile Connected Workplace Service allows the user to access company data from anywhere, edit it and share it.

---

Use Windows environments securely on any device from anywhere in the world.

## Facts & Figures

### Connected Workplace Service – in detail
