

Enterprise LAN

Secure and flexible. The modular solution for professional in-house networking.

Whether wired or wireless – with its Enterprise LAN service, Swisscom offers a comprehensive managed LAN (Local Area Network) service for small and medium-sized branches. Since you no longer have to worry about the local communication networks within a company location, you can concentrate fully on your core business.

Enterprise LAN offers you

- > a standardised LAN networking solution with no need to invest in expensive components
- > billing based on the number of access switch ports you use
- > a managed service with project planning, implementation, monitoring, operation, maintenance and variable service levels
- > professional radio measurement for wireless access points
- > flexible solutions that can easily be combined with other services

Your benefits

- > **Security:** communicate via a state-of-the-art, secure data infrastructure and benefit from the know-how of our security specialists.
- > **Availability:** gain high availability levels for your business-critical applications with selectable security options.
- > **Performance:** benefit from high productivity and efficiency for all your business applications.
- > **Future-proofing:** place your trust in the latest technologies, a modern service architecture and experienced Swisscom specialists.

Reporting – Information

Utilisation statistics / reporting	–
------------------------------------	---

- Standard (included in the price)
- Selectable variations (included in the price)
- Option (available at extra cost)
- Option not possible

Enterprise LAN is only available in combination with Enterprise WAN.

¹ The prior radio measurement is necessary and is invoiced separately due to the size of the location. A credit of 50% is applied when the order is placed.

² Service level and support time is defined by Enterprise WAN and adopted for Enterprise LAN.

³ Service down time in hours (max. duration).

Combinable products and services

Customer Service Manager

Customer Service Managers are your contact for operational matters. They regularly conduct service meetings with you, present and analyse the service reporting for your solution and derive recommendations for action from this. They actively operate the life cycle management for your solution. They provide you with suggestions on how to continuously improve your services.

Remote Access Service

You, your employees and your mobile communication terminals (e.g. in machines, industry terminals etc.) can exchange data with your company network or access applications securely from a mobile platform, regardless of location.
