Amazon Web Services by Swisscom

Amazon Web Services by Swisscom is aimed at companies who want to benefit from all the services of a global provider and want a reliable local partner to guide them on their way to the cloud.

What is Amazon Web Services by Swisscom?

With digitalisation, companies have to rethink their offers and bring them to market increasingly faster. In order to react agile to the changing market demands, many companies are shifting their IT to the Cloud. With Amazon Web Services (AWS), companies of any size can operate their IT partially or fully in the hybrid cloud. Amazon Web Services is a highly available, scalable, secure and high-growth platform for cloud infrastructure, PaaS and SaaS services. Swisscom assists you in all aspects of this, ranging from the design, implementation and migration through maintaining and operating your cloud solution, even for hybrid environments.
