

Having a complete fixed network telephony infrastructure involves much more than just making and receiving calls from Microsoft Teams. Managing and monitoring complex cloud configurations and integrating everything with existing telephony components can be very challenging and time-consuming. Let us handle the overall orchestration of your phone system - regardless of where you obtain your connectivity solution or Teams Phone.

Microsoft 365 Phone System Management from Swisscom ensures the smooth operation of your Microsoft Teams telephony solution and any peripheral systems that are dependent on it: From call centres to Skype for Business Server to third party providers, SBC and many more.

What does M365 Phone System Management include?

Something that is very simple and convenient for the user often entails a great deal of complexity for IT departments. Leave all of the hassle to us and invest the resources you gain in your core business. Our Swisscom experts can take care of the ideal configuration, operation, incident handling and monitoring of your Microsoft Phone system. Optionally, you can benefit from Microsoft Premium Support, which prioritises your issues and give you access to certified Microsoft Engineers at any time.

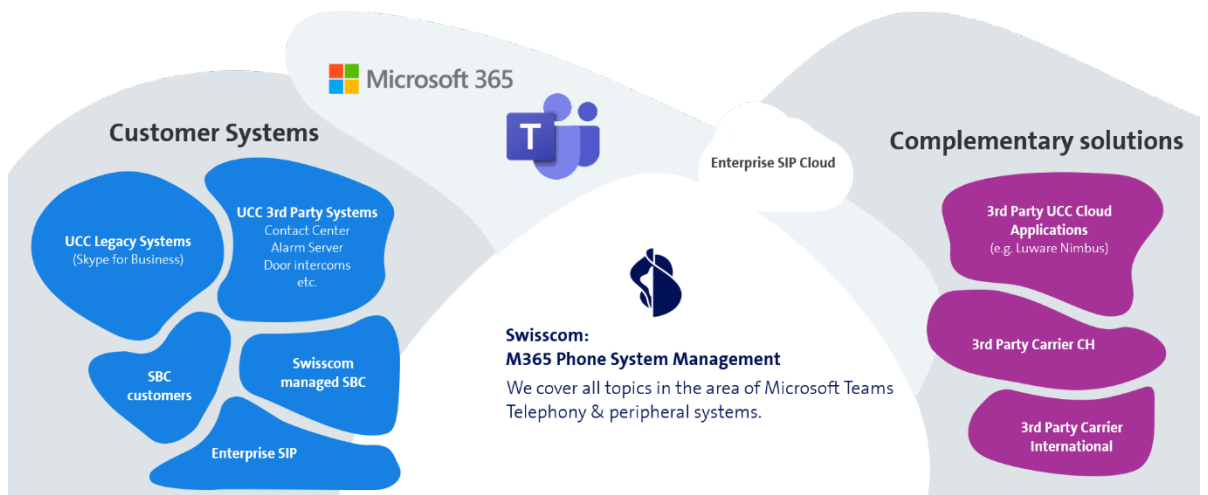

You would like to go one step further?

Optimise your telephony solution with [Enterprise SIP Cloud](#) and benefit from a direct and secure connection between your cloud telephony provider and the public telephone network. This allows you to use existing fixed network numbers with cloud telephony systems such as Microsoft Teams Phone.

Your benefits with M365 Phone System Management from Swisscom

- Individual offers
Choose between our Essential basic offer and our Business offer, which can cover higher demands on your telephony communication.
- Individual service and support
We offer service and support levels tailored to your needs.
- Maintain the existing infrastructure
Continue to use your components on site, such as door intercom stations or DECT telephones.
- Optimisation potential
We show you the required improvement measures in the event of insufficient and/or critical voice quality.
- Comprehensive management service
We take care of your overall telephony solution in Teams Phone: Configuration of the phone system and telephone connection; Teams telephony management; call routing between peripheral systems (managed SBC); management of third-party provider solutions; monitoring & reporting; comprehensive support.

We take care of everything
