

MS Teams Telephony Mobile

Ensuring collaboration and communication are secure, unified and compliant with corporate standards.

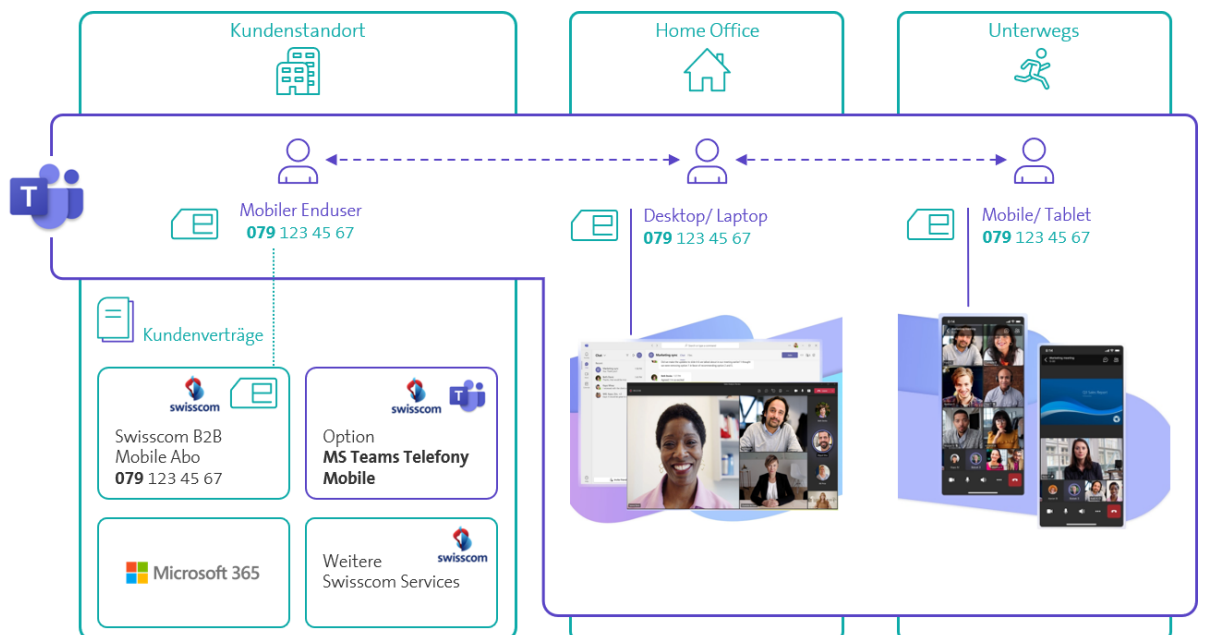

Now you can also make calls with MS Teams using your Swisscom mobile phone number.

What is MS Teams Telephony Mobile?

With MS Teams Telephony Mobile, you can connect your NATEL® go subscriptions to the most advanced communication and collaboration platform for business customers. You can be reached with your own Swisscom mobile phone number on all your MS Teams devices, ensuring your presence status in MS Teams is always up to date. Mobile lines are integrated into the organisation so that call groups, hunt groups, call forwarding or the display of special call numbers function uniformly. This ensures a consistent telephony experience on all your team-enabled devices, regardless of the available networks and mobile end devices. You improve the quality of collaboration and communication in your organisation with MS Teams Telephony Mobile, for everyone working on the move, from home or in the office.

Your benefits with MS Teams Telephony Mobile

- Always in touch in case of need: With your Swisscom mobile phone number, you can make and receive calls via the telephony function of your smartphone or via the MS Teams app on the device you are using.
- Needs-based: Ideal for employees who want to communicate with their Swisscom mobile phone number in any situation and regardless of where they are.
- Combinable: This offer can be added to all NATEL® go Swiss Flat and Roaming Flat subscriptions. The included services also apply to telephony with the MS Teams app, regardless of the device used.
- Compliance: Apply the defined rules (e.g. messages, groups or forwarding) for MS Teams telephony to your mobile lines as well.

Facts & figures
