

Digitalisation is enabling SMEs to update their products and bring them to the market more quickly. Your IT needs to be able to handle the increasing level of complexity.

Azure from Swisscom

Azure, the cloud solution from Microsoft®, can be flexibly adapted to your SME and your requirements – Swisscom brings the cloud to your company and provides local support.

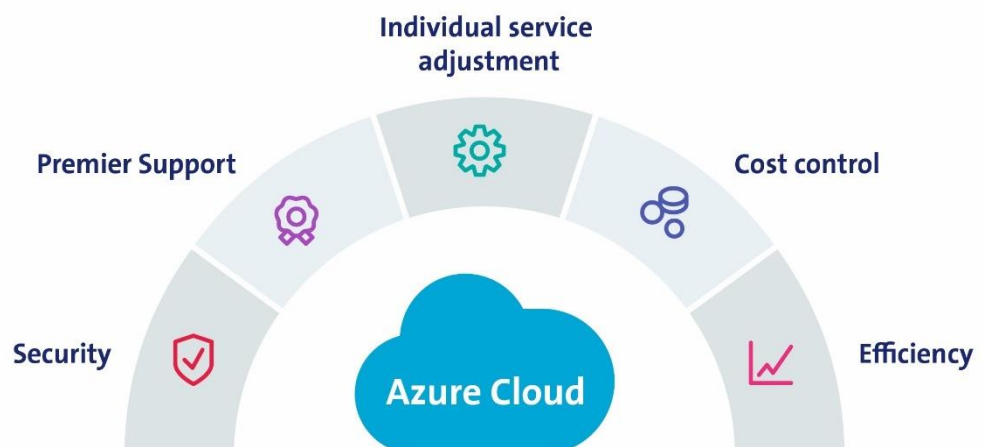

What is Azure from Swisscom?

Companies can run their IT either physically at their premises with their own hardware, or partially or completely in the hybrid cloud. Azure is a secure cloud solution for SMEs of all sizes. With our local partners, we can bring Azure to your company. Our specialists will help you to design your future cloud environment and support you in the digitalisation process with their broad expertise, so you can relax as you embark on your journey to the cloud. As a company, you will benefit from a reliable system that keeps your operations secure without requiring you to build up your own IT know-how.

Azure from Swisscom offers you the following benefits:

- **Security:** Azure meets the highest possible security and data protection standards.
- **Premier Support:** receive exclusive service benefits.
- **Individual service adjustment:** you can adjust services such as computer resources and storage capacity within minutes.
- **Cost control:** you are only charged for what you have actually used, simply through your Swisscom bill, so you can keep your costs under control.
- **Efficiency:** run your business applications efficiently and reliably in the cloud.

With Azure from Swisscom, your IT is not only secure, but also more flexible, faster and more affordable.

swisscom
