

# Verizon - our strategic provider for global WAN services

For more than a decade, Verizon has been Swisscom's strategic provider for global WAN services. In 2018, Swisscom has renewed its long-standing relationship with Verizon, offering flexible and suitable services to multinational companies in Switzerland.

## Some facts about Verizon

Verizon is one of the largest technology companies in the world and is using its network to power breakthroughs in interactive entertainment, digital media, the Internet of Things and broadband services.

As the technology partner for ten of thousands of customers including 98% of the U.S. Fortune 500, Verizon offers innovative solutions that enhance how people, places and things connect.

With a workforce of more than 54'000 employees, Verizon provides its services in more than 150 countries and 2'700 cities throughout the world. Verizon IP, data and voice traffic is carried over more than 80 submarine cables, a global IP network and 12 satellites orbiting the globe. Verizon has five Global Network Operations Center, nine state-of-the-art Security Operations Center on four continents, offering continuous security monitoring and management.

## Swisscom & Verizon USPs

### Strong delivery competence around the world:

Verizon can offer reliable International Connectivity Services together with Swisscom in 150+ countries.

### One single point of contact:

Swisscom is the single point of contact to its customers in terms of contract, implementation & service delivery. The customer experience is coherent across all geographies.

### Technology as a key business driver:

The relationship between Swisscom and Verizon is successful because both companies see technological innovation as a key business driver.

### Beyond pure WAN services

A dynamic mix of network technologies like Private IP (an MPLS-based VPN) offer the «best of both worlds». Additional Managed Network Services such as Managed WAN, Managed LAN, WAN Optimization Services and «Network-as-a-Service» solutions create added value on top of the traditional WAN solutions.

## Our platforms lay the right foundation.

### Global IP

- IP services in **more than 150 countries** and territories and support of **342K Private IP connections**

### VoIP

- Collaboration for more than **100'000 VoIP sites** and nearly **8M telephone numbers**

### Security

- **61B events** processed yearly (average) year.
- **11 years of forensics** investigations and incident data
- **9 security operations** globally

### Content Distribution

- **50+ Tbps** of network capacity
- **100+** points of presence

### IoT

- **1'000+** IoT projects delivered
- **Millions of IoT** devices connected
- **1'000+** technology partner ecosystem

### Mobile

- 4G LTE covering **98% of the U.S.** and wireless access in more than **200 countries**
- Wireless access in **25 countries** with **28 private wireless gateways**

### Cloud

- Secure Cloud Interconnect, connectivity to leading cloud services providers at **72 locations globally**
- Service chained applications deployed in **over 50 countries** and **20+ service locations**

Innovative solutions require robust platforms at global scale.
