

Rethinking the IT workstation. Cloud technologies are making it smarter and turning it into a real experience!

How can users set up their own IT workstation securely themselves, completely without IT? Microsoft 365 Endpoint Management by Swisscom makes this possible for you right now. Swisscom uses Microsoft Cloud technologies to make the IT workstation smarter and simpler.

Why do we need a new IT workstation?

- In the age of the cloud and remote work, workstation needs and demands are evolving.
- Traditional solutions such as on-site management of the IT workstation and its closed configuration are no longer sufficient.
- Provisioning processes are complex, expensive and require a lot of IT effort.
- Users want more flexibility, freedom and autonomy in dealing with the IT workstation.
- IT managers want to offer their users this choice, while still retaining control.

What does Microsoft 365 Endpoint Management by Swisscom involve?

Microsoft 365 Endpoint Management by Swisscom facilitates a modern and secure IT workstation, which can be set up quickly and easily by employees themselves, can be flexibly procured and is fully managed by Swisscom. At the same time, employees can use Mobile Application Management (MAM) to securely access company data and applications on mobile devices such as smartphones or tablets.

Benefits for your employees:

- Users set the device up themselves, no matter where they are.
- Hardware can be procured locally
- Up-to-date and secure IT workstation with the convenience of preconfigured apps (Office, Windows, browser, etc.).
- Mobile Application Management (MAM) allows secure access to company data and applications from a smartphone or tablet

Benefits for you as corporate IT:

- Provisioning of new workstations in Switzerland and abroad without burdening IT.
- Flexible procurement model with low prices and easy access.
- Swisscom handles the workplace operation including Windows 10 (and higher), security and client software management.

Easy to get started

Get started with Microsoft 365 Endpoint Management by Swisscom:

- **for Information worker Windows/macOS, from 30 users for CHF 29.– per user/month**
- **for MAM, from 50 users for CHF 4.90.– per user/month**
- Can be procured with or without hardware
