

## Enterprise Mobile

“Our processes are now totally consistent and accelerate business.”

Privera AG is the largest independent real estate service provider in Switzerland. As a leading innovator, it is forcefully driving forward the digitalisation of its business and working processes. Property inspections are becoming efficient and uncomplicated thanks to a ready-to-go solution.

### Privera AG

- > Sector: Real estate services
- > Branches: 12 in 3 linguistic regions of Switzerland
- > Employees: approx. 450
- > Activities: Management, centre, rental and construction management, trading
- > Credo: “We make more from real estate.”

### Challenge

Using an important tool – iPad with property inspection app – is set to involve as little effort as possible for the roughly 160 real estate managers at Privera. The devices are set to work under the maxim “unpack – set up – get going”; daily operation must be stable, secure and customer-friendly. And this without involving in-house IT Services, where possible.

### Solution

With Enterprise Mobile, Swisscom is providing Privera with a strong complete solution, guaranteeing seamless processes. Included in it is nationwide connectivity with NATEL® go subscriptions for data communication with the ERP and continuous Lifecycle Management of the iPad fleet. Remote administration of the iPads is guaranteed and the company data are protected.

Philipp Röthlisberger  
Team Leader, Platform Management /  
Dep. Manager, IT Services  
Privera AG

### Mr Röthlisberger, please complete the following sentences.

With Enterprise Mobile, we can ...

“... make our employees' daily work considerably easier.”

We like the solution because ...

“... it gives a great deal of oversight and simplicity in the company.”

Our customers benefit from Enterprise Mobile because they ...

“... receive clear and complete PDF documents very quickly.”

Our advertising slogan for Enterprise Mobile is:

“Out of the box – ready to go!”
