

Efficient and secure billing with eBill: Digitised billing

Digitise your billing with eBill. In the future, your customers will receive bills directly in their e-banking portal, where they can settle payment with just a few clicks of

the mouse. You reduce your costs and also benefit from reliable incoming payments and maintain control over the billing process.

Benefits and advantages of eBill

Get paid on time

Customers pay their bills more reliably compared to paper and email billing.

Efficient and secure billing

You create bills in your billing software and send them to your customers' e-banking portal via Conextrade, without any media interruptions.

Reduce costs

Eliminate the printing and posting of paper bills. You also achieve significantly increased efficiency with digital processes.

Greater sustainability

With eBill, you act sustainably by dispensing with paper, thereby generating a positive brand image.

Increase customer satisfaction

Thanks to eBill, your customers receive and check bills directly in their e-banking portal and can pay quickly and securely. You benefit from fewer customer follow-up queries and more reliable receipt of payments.

Everything centralised

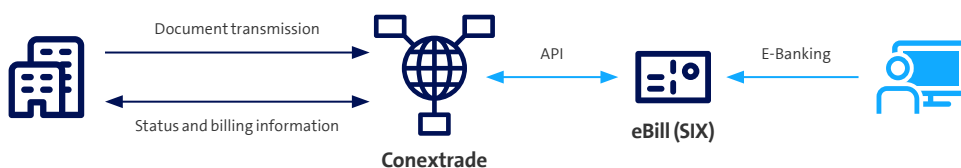

With Conextrade, you have a contact partner – both for eBill as well as Procure2Pay and Order2Cash processing.

How eBill works

eBill at a glance

Simple process

The eBill service from Swisscom significantly reduces the costs of billing.

1

The bill issuer supplies the billing data and PDF electronically to Conextrade.

2

Swisscom uses the billing data to create the bill in the eBill format and sends it to the eBill infrastructure.

3

The bill arrives directly in the e-banking portal of the bill recipient, allowing it to be viewed, saved and paid directly by the recipient.

eBill functions

No more errors

An issued eBill can be replaced by a new one if the first eBill contained errors, for example.

Additional attachments

You can send attachments to the bill recipient in addition to the bill.

Current status information

Status information is provided as feedback and transmitted to you.

Always up to date

You automatically receive information when new bill recipients have registered.

Optimal extension

E-Invoicing (B2B) and eBill can be implemented in the same integration project. Ideal as a complementary product for E-Invoicing PDF.
