

Price list AIS Service Personal Signatures

This price list is for partners, integrators and end customer integrators who want to combine their own subscriber application with signature front end with Swisscom's All-in Signing Service.

All prices quoted are in Swiss francs (CHF) and exclusive of VAT.

Provision, connection price and audit efforts

Provision, connection price and audit when using the standard identification procedure (RA App)

Services	Comment	Price per year	One-off purchase price
Annual service price per service interface (SAIP)	Annual settlement, for the first time in the month after signature of the contract	2'400.00	
Deviation from the standard ordering process (optional)	Examination or including of other legal clauses, CoC, etc.		6'000.00
Audit expenses per service interface (SAIP)	Audit with RA App	included	
	Audit price in the event of the customer neglected its obligations under the Contract	According to effort*)	

The RA App can also be used free of charge for identification purposes in case of a separate parallel registration office.

Option: additional price for project-specific identification procedures

A project-specific identification procedure is only offered in connection with an additional signed consulting contract "Signature Onboarding once per procedure. In addition to the one-off costs mentioned therein, the following annual charges are due for each end customer.

Services	Comment	Price per year	One-off purchase price
Additional audit expenses per registration authority	Audit with specific Registration Authority	5'000.00	
	Audit price in the event of deviations from customer's duties	According to effort*)	

Option: additional price for project-specific declaration of will procedures

A project-specific procedure for signature authentication is only offered in connection with an additional signed consulting contract "Signature Onboarding once per procedure. In addition to the one-off costs mentioned therein, the following annual charges are due for each end customer.

Services	Comment	Price per year	One-off purchase price
Additional audit expenses per procedure	Audit with specific procedure	5'000.00	
	Audit price in the event of deviations from customer's duties	According to effort*)	

*) Daily rate: Swisscom: 1'920 CHF, Auditor: approx. 2'600 CHF plus travel expenses

Signing Onboarding

If the customer wants to use its own method for identification and/or signature authentication the consulting contract "Signing Onboarding" shall be signed with the following partly optional packages:

Services	Comment	Price
Onboarding Workshop	Two half days online	4'900
Elaboration of an implementation concept	Ca. Four weeks	20'000
Use of own identification procedure and/or signature authentication method: Advisory support auf the audit and order and execution of an audit performed by a mutually agreed auditor (cost of auditor are included) - Own authentication method and declaration of will based on two factors (SCAL2 according to CEN 419 241) - Own identification method (except already audited by an eIDAS or ZertES auditor) - Import of registration evidences in case the Smart Registration Services is not used	Ca. Eight up to twenty weeks	55'000 50'000 35'000
Customer specific preparation support for the audit	Son request	
Use of the identification and registration method for AML purposes	Possible during the implementation concept	10'000
Online technical API training	Half day online	2'800

Due date for payment of the provision price, follow-up prices and audit expenses

The service prices are due annually, for the first time in the first month after startup of the service.

Setup prices for an own registration authority and own declaration of will procedures are due after conclusion of the service contract. The annual connection prices are due at the beginning of each contract year. There is only one audit per year. Swisscom Audit price in the scope of an own registration authority or own declaration of will process is due at the beginning of the new contract year.

The price charged to Swisscom or a third party commissioned by Swisscom for exercising the right of inspection and control is included in the price list above, unless the result of the control justifies a price payment by the participant, as it has not fulfilled its obligation.

Any additional audit costs incurred by third parties in the event of non-compliance with customer's obligations will be invoiced annually by Swisscom or third parties after the actual audit work has been carried out.

All refunds in case of premature termination of the contract are excluded.

Implementation concept incl. conformity assessment

An implementation concept is only necessary in the case of a new identification procedure or procedure for the declaration of wil (authentication), which deviates from the Swisscom standards and which must be submitted to the conformity assessment body. Swisscom supports the preparation of the implementation concept but cannot guarantee a positive assessment of the procedure; the risks here lie with the customer.

Please contact your partner manager for a template of the implementation concept and a first advisory call before ordering this option.

The support can only be provided after the contract has been signed:

- Training of the customer based on the regulatory requirements in accordance with the chapters in the implementation concept. Training takes place either on site in Zurich or via Skype and lasts 2 hours.

Prerequisite is the participation of the project manager and technical contact. It is recommended that the person responsible for security and a representative from legal advice also attend. During the training, the customer will present his implementation idea and Swisscom will specify further requirements (e.g. audits and audit reports).

- Review of the implementation concept drawn up by the customer. Experience shows that this takes place 2-4 months after training.
- Swisscom discusses the review with the customer (by telephone/via Skype or on-site in Zurich).
- If necessary, up to two post-reviews by Swisscom for necessary rework
- Assessment decision on the usage of the described concept (if necessary with conditions) or alternatively an offer for further analysis, assessment and audit services from Swisscom (including costs incurred by auditors commissioned by Swisscom if necessary).
- Audit services of third parties for the respective procedure for the preparation of test and audit reports are not included in the price. Only third-party costs are included Swisscom has to pay in order to apply this concept to the conformity assessment body.

Prices for current usage

The customer can choose between the price model "price per signature" or "price per signatory". The use of both price models in parallel requires the ordering of two ClaimedIDs (SAIPs) and thus the service fee will be invoiced twice.

Price per signature (volume dependant)

The volume consumed for the respective contract year is decisive. The price per signature falls from one volume band to the next for the following signatures.

Services	Volume band: Signatures per year via a Service Access Internet Point			Price per signature (CH)	Price per signature (EU)
Advanced Electronic Signature (AES) incl. time stamp CH: Swiss judicial area EU: EU/EEC judicial area	1	-	50'000	0.50	0.75
	50'001	-	200'000	0.45	0.68
	200'001	-	1'000'000	0.40	0.60
	exceeding			0.35	0.53
Qualified Electronic Signature (QES) incl. time stamp CH: Swiss judicial area EU: EU/EEC judicial area	1	-	50'000	1.00	1.50
	50'001	-	200'000	0.90	1.35
	200'001	-	1'000'000	0.80	1.20
	exceeding			0.70	1.05

Alternative model: Price per signatory (Flatrate)

The placement of a signature in the contract month by a signatory is decisive. A signatory is identified by its name in the signature certificate (technically "Distinguished Name", e.g. "CN=Hans Mustermann, C=CH, serialNumber=<unique number>"). All subsequent signatures in the month (hereinafter "active contract month") are included in the price for this signatory (monthly flat price).

Services	Calculation	Price per month
Advanced Electronic Signature (AES) with qualified time stamp Swiss judicial area	Per signatory and contract month and Service Access Interface Point (SAIP)	1.50
Qualified Electronic Signature (QES) with qualified time stamp Swiss judicial area	Per signatory and contract month and Service Access Interface Point (SAIP)	3.00
Advanced Electronic Signature (AES) with time stamp EU/EEC judicial area	Per signatory and contract month and Service Access Interface Point (SAIP)	2.25
Qualified Electronic Signature (QES) with time stamp EU/EEC judicial area	Per signatory and contract month and Service Access Interface Point (SAIP)	4.50

Due date of payments of current usage prices

The current usage prices will be invoiced after one month. Depending on the selected usage price model, the service billing contains the number of signatures executed per month or the active signatories.

All refunds in case of premature termination of the contract are excluded.

Use of several Service Access Internet Points

Volume bands or signatures are applied per Service Access Internet Point. Volumes cannot be accumulated across multiple Service Access Internet Points. If several separate Service Access Internet Points must be supplied with remote signatures (examples: Reseller, internal reselling through a central purchasing department of a group of companies), all current usage prices are reduced again by 30%. Amounts are rounded up to the nearest centime.

Glossary

AIS Service	All-In Signing Service, which is provided by Swisscom up to the SAIP.
Distinguished Name	Standardized form to describe a certificate subject.
RA	Registration Authority, responsible for identifying the signatories. Can be provided by the participant, Swisscom or third parties on condition of a contractual relationship with Swisscom.
SAIP = Service Access Internet Point	The Service Access Interface Point (SAIP) is the contractually agreed logical point at which the service is provided and monitored for the customer, as well as the service levels provided. It is the communication point with the user application.

Example

52,000 QES signatures (CH) are executed annually by 1,000 persons. Each of these people signed during 3 months of the year.

Variant 1:

Position	Calculation	Price
Yearly cost of service		2'400.00
Cost per signature till 50'000	1.00 x 50'000	50'000.00
Cost per signature > 50'000	0.90 x 2'000	1'800.00
TOTAL		54'200.00

Variant 2 (per signatory)

Position	Calculation	Price
Yearly cost of service		2'400.00
Cost per signature	3.00 x 1'000 x 3	9'000.00
TOTAL		11'400.00

In case both variants should be used the double fee (4'800 CHF) must be paid.

Application specific prices

If the All-in Signing Service is used with one of the following partner applications Swisscom provides a connector. In case of all other partner applications please contact directly the supplier.

Services	Comment	Price per year	One-off purchase price
DocuSign Connector - in order to use QES within DocuSign	Annual settlement, for the first time in the month after signature of the contract	25'000	
DocuSign Test Account			5'000
