

Secure and efficient handling of patient data and documents in everyday clinical practice.

Swisscom Mobile ID for eHealth

### Strong authentication ensured by Swisscom

#### What is Swisscom Mobile ID?

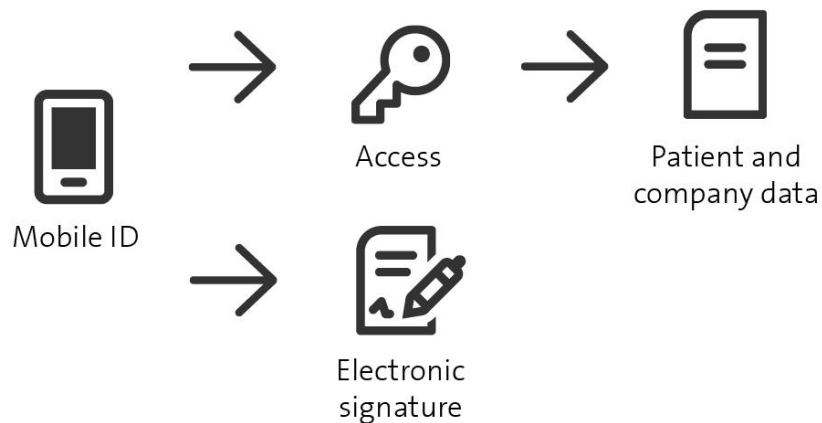

With the Swisscom Mobile ID authentication solution, you protect access to patient data and applications with a comprehensive complete solution for two-factor authentication (2FA). Mobile ID is secure, simple, proven and offers great added value. Your priority remains the delivery of medical services, while we support your implementation and ensure compliance with stringent regulatory requirements. You set the pace while we take care of security and expandability.

#### Your advantages with Swisscom Mobile ID

- Simply open all relevant documents with the Mobile ID login and sign them with your mobile phone.
- Access to patient and company data always under central control.
- Minimal distraction of your valuable resources thanks to outsourced processes and responsibilities.
- Easy installation and use via smartphones without the need for additional hardware.
- Collaboration with an experienced and trusted external IT security partner.
- Calculable demand-based pricing – you only pay when you use it.

Swisscom Mobile ID: the future-proof solution for efficient and effective processes in the hospital.

### The solution at a glance

swisscom
