

In our modern and digitised world, SMS messages are used in numerous business processes: They help financial institutions with authorisations, alarm centres with alarms, support companies with informing their employees and are also used in mobile marketing.

Send and receive SMS messages worldwide conveniently via your applications

What is Web to SMS?

With Web to SMS you can send national and international SMS messages in the shortest possible time via REST-API. And SMS replies can be sent conveniently to your e-mail account. This solution is ideal for sending SMS tokens or for mobile marketing, such as distributing information and sending reminders and invitations. Im Self Care- Portal stehen Ihnen Echtzeit-Reports zur Verfügung, auf welchen sie jederzeit den Traffic auswerten und im Auge behalten können. Zudem können diese auch exportiert werden.

Your benefit with Web to SMS

- Keine zusätzliche Infrastruktur
Send SMS easily from any business application via the standardised REST API.
- Managed Service
Make use of a well-established Swisscom service. You will not need to carry out any maintenance work whatsoever.
- Einfaches Handling
You can individually authorise application access and manage this independently via the Self Care portal.
- Weltweit kommunizieren
Communicate easily and conveniently with your customers all over the world.
- Self Care Portal für Business Kunden
Verwalten Sie Ihren Service einfach online. Die versendeten Nachrichten werden Ihnen direkt im Reporting angezeigt.
