

Are you looking for a comprehensive banking solution that adapts flexibly to your requirements? With Managed Finance Ecosystem, you receive the highest quality, clearly calculable IT costs and trustworthy support from industry-specialists.

**Swisscom takes care of your entire banking IT, peripheral systems and, if required, your banking processes – so you have time for your valuable customer relationships.**

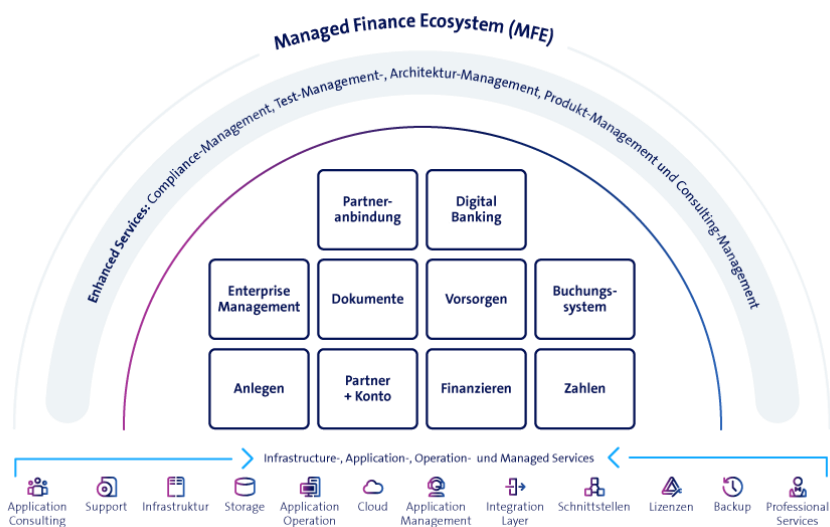

Regardless of whether you are a private, retail, crypto or commercial bank – or perhaps you are yet to set up a bank. Our managed banking solution is already being used successfully by our client banks addressing all individual needs. Because we understand that every bank is different.

With the Managed Finance Ecosystem (MFE), you can rely on complete IT outsourcing for your bank. You will receive a stable core banking system and the appropriate peripheral systems, including operation and support. Other IT services such as the workplace and infrastructure are also available. If required, Business Process Outsourcing (BPO) services such as payment transactions, securities or tax processing can supplement our integrated banking solution. All from a single source.

### How you benefit from the Managed Finance ecosystem

|  |   |
|--|---|
| <p><b>Flexible choice of services</b></p> <p>You select the services you require from the specialised banking service packages.</p>                                | ✓ |
| <p><b>Tailor-made thanks to customisation options</b></p> <p>Individually required peripheral systems from third-party providers can be integrated seamlessly.</p> | ✓ |
| <p><b>Use of platform synergies</b></p> <p>Cost-effective participation in projects.</p>   | ✓ |
| <p><b>Access to a large pool of resources and expertise</b></p> <p>Our trusted and experienced experts are on hand to help you in three languages.</p>             | ✓ |
| <p><b>Focus on your customer relationships</b></p> <p>More time to focus your core business and valuable interactions with your customers.</p>                     | ✓ |
