

Application Modernization Assessment by Swisscom

Take the first step towards your application modernization journey

Application Modernization Assessment

Benefit from our wide-ranging experience in application modernization allowing you to focus on your core business while our experts guide you on your application modernization journey.

What is the Application Modernization Assessment?

Based upon an interactive one-day workshop, the Application Modernization Assessment utilizes a structured approach to drill deeply into one or two selected applications that qualify for a possible modernization.

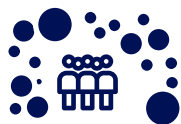

Focusing evenly on technical, organizational, business requirements and opportunities, the result is an easy-to-comprehend high-level future application architecture, along with an initial roadmap and tentative costing for implementation.

The assessment will give you meaningful inputs for creating a compelling business case for modernization.

The benefits

- Current state analysis
With the assessment you'll gain a broader knowledge about your application's current state and deeper insights into the challenges you are facing.
- High-level target architecture
Based on analysis, Swisscom experts deliver key recommendations, a high-level target architecture and possible alternatives.
- Modernization Roadmap
By breaking down the target state into manageable work packages, the modernization roadmap gives you a clear overview of all the work that needs to be done and the roles that are needed to conduct the modernization.
- Budget Planning
The assessment will deliver tentative costing for your budget planning.

Facts & Figures

The application modernization assessment runs for 4 days. Customer participation is required at the first and fourth day.

Duration

Workshop day

Guided interaction with the core stakeholders from your organization. A deep dive of the current architecture for selected applications is conducted to identify pain points and challenges. This is done through a tailored questionnaire, the topics of which are shared with you beforehand.

Design

Internally, the Swisscom team evaluates the customer's inputs to create the recommended high-level architecture and the modernization plan which is presented to the customer at the review session.

Review

The Swisscom team presents the outcomes of the assessment along with a rough cost estimate for the actual application modernization.

Next Step

Following up on the review session, the next steps are jointly planned-out to determine how to proceed with the application modernization.
