

SAP on AWS: Swisscom Discovery Workshop – the first step to a more efficient storage of your SAP environment in AWS cloud.

The Discovery Workshop introduces users to Amazon Web Services Platform’s value proposition (AWS for short), and its services for companies who use SAP. It is designed to teach specific SAP workloads, processes and projects, and provide a basic understanding of the architecture, migration options and tools as well as how SAP on AWS works.

The “SAP on AWS Discovery Workshop” is an important step in the overall process of preparing a business customer for SAP migration to AWS cloud. Swisscom helps organisations prepare, plan, realise and optimise

their SAP migration to AWS cloud, while observing the official SAP-on-AWS migration method. This is aimed at managers responsible for SAP and their teams within an organisation.

The objective is to support managers and teams in achieving their company’s key goals, as well as develop the strategy for moving their organisation’s SAP workloads to AWS cloud.

Your benefits

A review of

the company’s business and IT goals, the current SAP workload, how SAP works along with its ongoing and future transformation process in terms of SAP.

The Discovery Workshop

provides business customers with a basic understanding

- the SAP-on-AWS value proposition
- the SAP-on-AWS architecture
- how the SAP-on-AWS works
- the SAP-on-AWS migration approach

Expert recommendations

on the following subjects for real results:

- Scope of the expert systems for the SAP on AWS migration
- Migration approach
- Technical options and tools for the migration
- Key premises for the migration
- Swisscom SAP on AWS Operations Model

After completing the “SAP on AWS Discovery Workshops”, you will have a comprehensive understanding of the SAP on AWS value proposition, its architecture, how it works and the migration approach. For more information visit: swisscom.com/aws
