

Connectivity Management Platform (CMP) Mobile

Simple, efficient and reliable: Location-independent control and management of all IoT devices.

If you want to effectively exploit the many advantages of IoT applications, you cannot avoid CMP Mobile. Regardless of the industry or specific application, it forms the basis for centrally organizing the connectivity of all end devices.

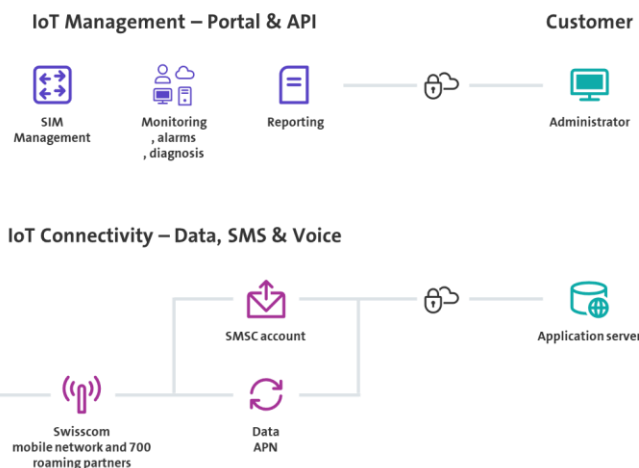

What is Connectivity Management Platform Mobile?

With CMP Mobile you have a central administration with which you can efficiently control and manage the global connectivity of all end devices. Individual SIM management, detailed reporting, full control thanks to monitoring and diagnostics, intelligent administrator functions, products with ready-to-use connectivity for end customers or completely new business models are enabled by CMP Stores without media discontinuity. Furthermore, three different speed profiles guarantee you ideal download rates. Thanks to local gateways, the user data remains in Switzerland and a georedundant data center and corresponding connections (VPN, LAN-I) guarantee the highest level of security.

Your benefit with Connectivity Management Platform Mobile:

- Maximum flexibility in accordance with your requirements both today and in the future
- Always up-to-date thanks to constant developments
- Full scalability thanks to growth with your requirements
- Calculable costs thanks to flexible tariff models
- First-class connectivity worldwide
- Dedicated technical IoT support available 24/7.

Test your IoT solution professionally: Our Demo Kit gives you three months of full access to CMP Mobile, including SIM cards, service and support.

Facts & Figures

CMP Mobile in detail

Lite Smart Basic Advanced

Connectivity

SIM

- SIM Type: 2FF/3FF robust (micro) 4FF standard (nano)
- Solderable IoT SIM Chip (SON-8)
- Solderable automotive M2M SIM Chip
- eUICC
- Pluggable 3-in-1 standard

PIN

- Static (inactive oder active)
- Customer-specific
- Pin code inactive

Text on SIM

- Standard text on SIM
- Customer text on SIM

Transmission service

- Data (3G & 4G; LTE-M)
- Narrowband IoT (NB-IoT)
- SMS
- Voice calls emergency application (VoLTE)
- Pooling Price plans (bundling of contingents)

Roaming

- Open
- Locked
- Individual roaming profile

Sicherheit

- Shared APN
- Personal Internet APN (Firewall profile)
- Secure Internet APN (VPN IPSec tunnel) / redundant
- LAN-I APN (SLA) / redundant

SMS Gateway

Reporting

- General
- Individual

SIM profiles

1 1 max. 2 >2

Service Level Agreement

- Support (weekdays, 07:00 – 18:00 Uhr)
- Support via the portal
- Optional: Technical support 24/7
- Portal training Individual
- Portal training online / recording
