

# Minimise your cyber risks – Vulnerability Advisory helps you to quickly identify potential vulnerabilities in your IT infrastructure and to prioritise and effectively reduce existing risks.

**Swisscom’s Vulnerability Advisory focuses on presenting existing vulnerabilities in your IT systems in a way that is straightforward and easy to understand. This enables you to minimise your cyber risks and protect your company from attacks.**

Swisscom analyses the findings from your current vulnerability management solution and helps you to develop suitable measures.

Our experts prioritise these vulnerabilities according to their criticality, enabling you to take targeted and effective measures to improve the security of your entire IT infrastructure.

In addition to a detailed analysis of your vulnerabilities, you will also receive a specific action plan. This will arm you against future threats. Our aim is to make your IT infrastructure robust and secure, so that you can concentrate on your core business.

## Benefits of Swisscom’s Vulnerability Advisory service for you

---

### Independent and precise vulnerability analysis

Our service provides you with a comprehensive overview of the current vulnerabilities in your IT infrastructure. We draw up a detailed analysis and a specific action plan to eliminate the identified vulnerabilities.

---

### Risk minimisation

Swisscom helps you perform a targeted vulnerability analysis and assessment in order to prioritise the most critical vulnerabilities and take immediate action to minimise the risk of an attack.

---

### Manufacturer-independent vulnerability consulting

Our service is manufacturer and solution-independent. This allows us to adapt flexibly to your existing infrastructure. We can connect directly to your vulnerability management solution. However, if this is not possible, all we need is an export of the vulnerability information.

---

### Access to expert knowledge and up-to-date threat intelligence

Benefit from our in-depth expertise and experience in the field of IT security. We’ll keep you up to date with the latest threats and security developments so that you are always one step ahead.
