Cover the information security requirements in your company with CISO as a Service.

CISOaaS (Chief Information Security Officer as a Service) is the right choice for companies wishing to improve their degree of security.
The development and application of new technologies, especially in conjunction with cloud platforms, opens up a wide range of exciting opportunities but also new risks for companies. As a result of these changes,

security requirements are evolving far beyond the traditional perimeter protection model. Governance, clearly defined security measures and end-to-end control of security processes and solutions are indispensable. Swisscom experts support you in all aspects related to security, where necessary, by acting as information security officer (ISO or CISO) for your company.

Your benefits with CISOaaS – Expanding your team
