

Cloud computing makes it possible to provide IT services quickly and flexibly. At its core, however, information and data are constantly being processed, and protecting it creates new demands for your IT department. We can help you keep your information secure at all times in accordance with your needs, including in the cloud.

We will help you to comprehensively protect your IT, whether it is fully cloud-based or hybrid, focusing on the technical aspects of security.

What is the Microsoft Azure Security Assessment?

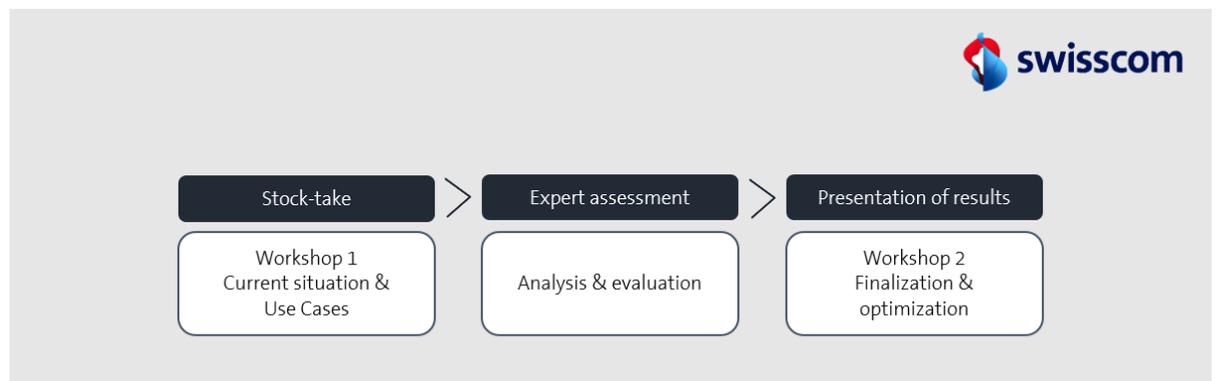

In a structured assessment, we will assess your current and/or planned implementation of data security in Azure. We'll also check your Azure architecture, from the virtual network to security groups, role assignments and policies. This will enable us to develop a comprehensive picture of IT security in your current cloud deployment, which we will complete and optimize by offering professional advice on the security tools offered by Azure.

After the assessment is complete, our experts will suggest some possible improvements and, on request, explain in greater detail how you can carry out important tasks in different fields on the basis of a subsequent cloud security agreement.

Your benefits with the Microsoft Azure Security Assessment by Swisscom

- **Comprehensive assessment**
Measure your maturity in relation to cloud security in Microsoft Azure.
- **Knowledge-sharing**
Basic and in-depth explanations of different topics for your company during the workshops.
- **Solid know-how**
Access to security-related expertise based on real-life experiences.
- **Technical approach**
We'll provide practical recommendations based on the Azure deployment that we find.
- **On-premise implementation**
Our experts will implement the service at your premises in agile teams for a fixed price or an hourly fee.

How we carry out the Microsoft Azure Security Assessment

The information in this document does not constitute a binding offer. It is subject to revision at any time.

Facts & Figures

Assessment duration and cost

Duration: 4 days, comprising

- 2 half-day workshops at your premises or online
- 3-day concept development and presentation of results by Azure security experts from Swisscom

Cost: CHF 9,800, including an Azure CSP subscription with a CHF 250 allowance for three calendar months.

Basic assessment process

Stock-take

At a half-day workshop, we will examine your current IT infrastructure and business requirements, and together we will define use cases and security enhancement options. We will look for possible vulnerabilities in your Azure environment by conducting interviews and machine-based analysis.

Expert assessment

The security status of the analysed environment will be clearly explained in a detailed report (CIS Benchmarks v1.2.0 or similar). Swisscom Azure security experts will analyse and evaluate your current situation. Based on their analysis, we will organise a workshop on making your Azure environment more secure as part of the Cyber Security Assessment. There will also be an opportunity to use the knowledge of Swisscom's Azure security experts in order to focus on individual Azure services. All aspects of a comprehensive security architecture can be covered, including development, system security, data security, secure communication, identity and access management, and logging and security analytics.

Presentation of results

Presentation of the Swisscom expert assessment, including:

- analysis and report on the current situation with a management summary
- detailed list of analysed resources, including evaluation and identification of the main risks and recommendation on mitigation.

Azure subscription

If you do not yet have an Azure subscription, you will receive an Azure CSP subscription (CHF 250 allowance for three calendar months) as part of the assessment.

Optional services

We will give you comprehensive support with all matters related to Azure security.

We will develop a target operating model (business transformation) for you.

We will carry out change management (organisational transformation) for you.

We will support you with our extensive portfolio of Microsoft Cloud services so your journey to the cloud is a success.

With our portfolio, we adopt a holistic approach. In addition to Professional Services, Managed Services and our Reselling+ portfolio, we are your partner for Microsoft 365 and Dynamics. Find out more at www.swisscom.ch/azure.
