

Modernisation, optimisation and transformation are the big topics of today's IT world. To ensure your journey to the cloud is a success, we'll help you understand and make the most of your system landscape with our Infrastructure Assessment for Azure.

With the Infrastructure Assessment for Azure, we will give you the overview of your IT infrastructure that you need to make better cost-saving decisions and improvements.

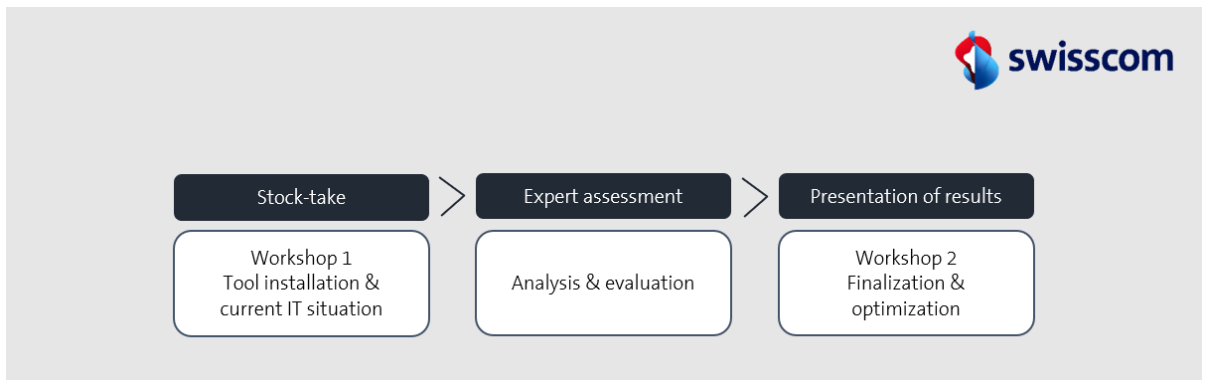

What is Infrastructure Assessment for Azure?

Over the last few years, your IT infrastructure has grown and your footprint has become bigger and bigger. In our assessment, we'll help you to organise your entire global IT environment in a way that enables you to filter out the most cost-effective and sustainable VM configuration, as well as the most efficient storage system for your applications. We'll identify the dependencies between your systems so they can be neatly moved to the cloud. We'll cover both your server landscape and your SQL environment. You will be able to see exactly what resources you are using and how you can optimise and modernise your entire IT landscape. In order to keep your cloud costs low, avoid unnecessarily high usage levels and make the most of your operating expenditure, we will take into account offers, prices for each Azure region and cost-saving measures in the cloud.

Your benefits with the Infrastructure Assessment for Azure by Swisscom

- **Optimise infrastructure**
We will establish your infrastructure's potential and suggest different ways of improving it.
- **Take stock**
We will give you an overview of your current IT landscape.
- **Cost and cloud readiness check**
You will receive a cost calculation for your server workloads and an estimate of the current status of your server and SQL environment for operation in the cloud.
- **Cost-saving**
We will show you ways of improving and cutting the cost of existing workloads in the cloud.
- **Opportunities and risks**
Receive a list of the opportunities and risks of operating in the Azure Cloud.
- **On-premise implementation**
Our experts will implement the service at your premises in agile teams for a fixed price or an hourly fee.

How we carry out the Infrastructure Assessment for Azure

Facts & Figures

 Assessment duration and cost	<p>Duration: 4 days, comprising</p> <ul style="list-style-type: none"> • 2-day workshop at your premises or online • 2-day concept development and presentation of results by Swisscom <hr/> <p>Cost: CHF 9,800, including an Azure CSP subscription with a CHF 250 allowance for three calendar months.</p>
 Basic assessment process	<p>Stock-take At a whole-day workshop, we install a tool to analyse the current situation of your IT infrastructure, as well as all the working methods and tools you are currently using.</p> <hr/> <p>Expert assessment Concept development based on the data compiled through the (partly tool-based) stock-taking process.</p> <hr/> <p>Presentation of results Presentation of the Swisscom expert assessment at a whole-day workshop including:</p> <ul style="list-style-type: none"> - recommended mapping of your infrastructure in Azure (target setup, optimisation opportunities). - demonstration of cost structure in Azure. - comparison of current costs with possible future costs in Azure. - proposed migration plan, including recommended cost-saving measures relating to licensing and workload. <hr/> <p>Azure subscription If you do not yet have an Azure subscription, you will receive an Azure CSP subscription (CHF 250 allowance for three calendar months) as part of the assessment.</p>
 Optional services	<p>We will help you with your projects, from the initial concept to implementation to operation.</p> <hr/> <p>We will carry out proofs of concept and technological tests adapted to your requirements.</p> <hr/> <p>We will help you with the migration process.</p>
