

# Swisscom and Telit Cinterion strengthen their partnership

Zurich, Switzerland – February 2025 – Swisscom and Telit Cinterion are pleased to announce the renewal of their partnership, aimed at simplifying and enhancing the Internet of Things (IoT) solutions for Swisscom customers. Through this collaboration, Swisscom leverages its extensive IoT expertise alongside Telit Cinterion's advanced capabilities, particularly the Telit Cinterion deviceWISE® EDGE platform, to provide customers with optimal IoT implementations.

For many years, Swisscom has relied on Telit Cinterion's deviceWISE EDGE IoT solutions, successfully supporting numerous customers across various industries. This renewed partnership, effective from February 2025, aims to address the current challenges faced by IoT customers more effectively and individually. By working together, Swisscom and Telit Cinterion offer efficient, profitable, and comprehensive solutions to navigate the complex and often costly nature of IoT projects.

By combining their core competencies, Swisscom can support customers from diverse sectors such as industrial automation, transportation, surveillance, energy infrastructure, and smart cities in implementing customized IoT solutions that are both functional and user-friendly. Customers benefit from a holistic IoT solution from a single source that is reliable, secure, and quickly deployable.

Telit Cinterion places great emphasis on innovation and continuous product development, with a strong focus on cost efficiency and flexibility to respond swiftly to changing market demands. Swisscom shares these values and is enthusiastic about continuing the long-standing and successful partnership. Telit Cinterion
