

**Application for Prolongation (2 years) of existing Partner Test Account
All-in Signing Service****1 Purpose of the document**

This document serves as an information and application form for a prolongation of an existing partner (or its end customer) test account for Swisscom's All-In Signing Service.

2 Access requirements: SSL access certificate

For the new test period we need a new SSL access certificate.

For each connection (via https) to the AIS service, the subscriber generates a self-signed SSL client certificate with a key length of at least 2048 bits for authentication to the AIS service and transmits the certificate to Swisscom in advance.

The structure of the certificate is as follows:

- Content of "subject" i.e. "distinguished name" of the certificate:
 - CN=< URL of the subscriber system that communicates with AIS >
 - emailAddress=< E-mail address of the contact person for this connection >
 - O=< name of the organization >
 - C=< country in which the organisation is based >

The validity may not exceed 2 years. There are no specific requirements for the key uses. Please mark your choice:

- The certificate has already been generated and is sent along with this application.
- The certificate will be forwarded to MSC.support@swisscom.com with reference to this application.

3 Contact data of the partner**3.1 Partner's address**

Company name / organization name _____
