

Back up your data in the Swisscom cloud whenever you need to

Managed Backup

You no longer need to worry about backing up your data, servers or mailboxes

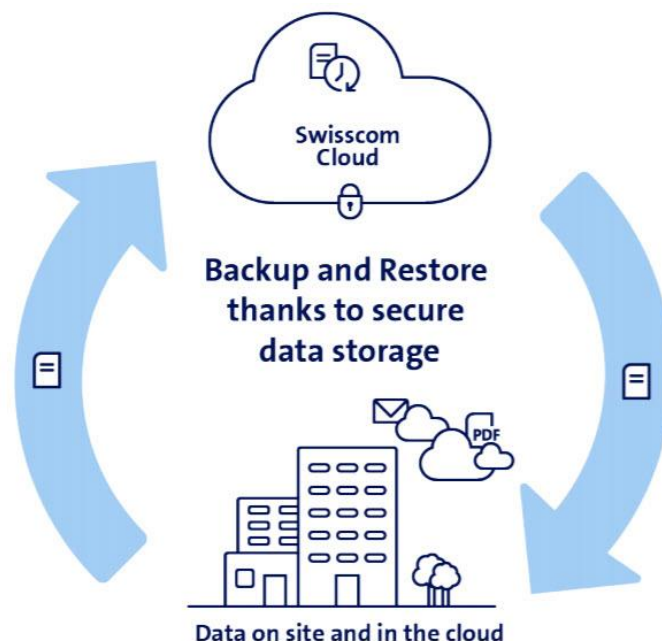

What is Managed Backup?

With Managed Backup, you can securely store your data in the Swisscom cloud. Your corporate data is always secure and available thanks to georedundant distribution.

Swisscom ensures that your backup system is set up exactly how you need it with regard to the storage period and recovery of your data. Your data is automatically backed up to the cloud every day. Whether you need to recover individual files or an entire server, Swisscom will do the job for you.

Your benefit with Managed Backup

- **Data in Switzerland**
Securely back up your data in Swisscom data centres in Switzerland.
- **Lower costs**
No need to invest in additional hardware and software.
- **Monthly billing**
You only pay for what you actually use.
- **Swisscom SME IT help desk**
Personal contact and multilingual support, which will recover your data for you.
- **Flexible & individual**
Managed Backup adapts as your business grows, offering you storage as and when you need it.
