

Sweep Enterprise Plan

Take carbon footprint reduction to the next level

There are good reasons for companies to be transparent about their carbon footprint and reduction path to net zero:

1. Pressure from regulators, customers, investors and employees is sharply increasing. Software solutions can help your company to comply with legal requirements and provide transparent information about non-financial issues to individual stakeholder groups.
2. By improving resource efficiency and using renewable energies, your company can reduce costs and benefit in the long term.
3. When you invest in CO2 management at an early stage, your company achieves an advantage over competitors by attracting and gaining environmentally conscious customers.

It is worth using transparent and attractive software to support your efforts to improve your carbon footprint and for your reduction path to net zero. Sweep and Swisscom can help you with this.

Are you ready to meet your sustainability goals? We look forward to supporting you on your path to net zero.

Your benefits

- ✍ **Comprehensive data analysis:** Record your total CO2 emissions using Excel uploads, surveys, automated interfaces, connection to your suppliers and/or manual inputs – whichever suits you best.
- ✍ **Efficient action planning:** Define your targets and implement effective measures to reduce emissions. Sweep can help you to make optimal use of your resources.
- ✍ **Meet compliance and reporting requirements:** Simplify regulatory compliance and easily create reports for stakeholders, customers and investors.
- ✍ **Increased user-friendliness:** The intuitive interface makes using Sweep easy and accessible for your entire team.

Implementing the software in your company:

- 📄 **Collect the data**
 - Easily collect data using Excel uploads, surveys, automated interfaces, supplier connections and/or manual inputs
- 📄 **Define the reduction path and measures**
 - Define the reduction path to net zero
 - Define reduction initiatives, including responsibilities
- 📄 **Share results internally and/or externally**
 - Publish dashboard internally or externally
