

Becoming a mobile company is no longer an option but an inevitability. Mobility is the basis for transformative changes and shows the way to a new level of productivity. These facts therefore require radical rethinking from businesses and a focus on the Mobile First strategy. Mobility can be managed with an EMM solution. In addition, maximisation of productivity with simultaneous minimisation of risk for mobile employees is ensured.

**EMM secures your business data on mobile devices, increases the productivity of your employees and taps the potential for innovation in your company.**

**What is EMM?**

The EMM solution from Swisscom uses a powerful combination of expertise, services, software and protective measures to increase the productivity of employees with BYO or company terminals and to ensure consistent security on mobile devices. Swisscom has the best network in Switzerland and operates in all areas together with leading technology partners to be able to provide the best solution for every requirement. The software solution used is from MobileIron, one of the leading EMM providers worldwide.

Best support from Swisscom EMM experts
- Best network in Switzerland  
Whether at home or on the move
- Multilingual Swisscom Support  
Customer service in the preferred language

The solution at a glance.

**Mobile Device Management (MDM)**

Get control over who connects to the corporate network (e.g. BYOD and COPE guidelines). The devices are automatically configured and set up. The personal and business data of your employees is separated.

**Mobile Application Management (MAM)**

Increase the productivity of the company with a security concept for mobile applications which enables the distribution, protection, and management of apps. Apps with company data are encapsulated in containers, which separates them from private apps.

**Mobile Content Management (MCM)**

The availability of content and files on mobile devices enables access anytime, anywhere. Joint work on content increases productivity. Optimise your internal information and communication channels.

**Mobile Identity Management (MIM)**

Mobile Identity Management enables the company to authenticate users' identity and provide access to trustworthy devices and business applications.

The information in this document does not constitute a binding offer. It is subject to revision at any time.

## Facts & Figures

### EMM in the Swiss Cloud

This solution provides a secure infrastructure-as-a-service based on OpenStack. Our experts will advise you in order to ensure smooth IT operations.

Data hosting in the highly secure data centres of Swisscom in Switzerland.

With the EMM Swiss Cloud, you increase your agility. The required storage capacity is available to you immediately.

You book and pay only for the resources that you effectively use.

The Swiss Cloud solution from Swisscom meets the world's most stringent requirements for compliance, security and data protection.

You benefit from low investment costs and maximum flexibility.

With this usage option, you can quickly deploy and release the resources with minimal management effort and minimal interaction of the service provider.

### EMM in the Private Cloud

We offer custom IT resources from the Swisscom Private Cloud that are tailored to your requirements.

You receive your own physical resources in highly secure, geo-redundant Swisscom data centres. Your data is hosted in Switzerland.

Our EMM experts will advise you in all respects and are always available to you. You do not need any special IT expertise.

We look after the system and take over maintenance of the relevant guidelines. Internal training is also organized if this is desired.

We offer highly scalable services. Depending on requirements, the resources can be added or dropped at any time.

Depending on the individually agreed Service Level Agreements, we are available 365 days a year, 24 hours a day, and guarantee maximum availability.

### On Premise

This solution gives you complete control over the platform on your own server in your own data centre.

Swisscom installs and configures the EMM system in your data centre.
