

**Application for Prolongation (90 days) of existing Test Account All-in Signing Service****1 Purpose of the document**

This document serves as an information and application form for a prolongation of an existing test account for Swisscom's All-In Signing Service.

**2 Access requirements: SSL access certificate**

For the new test period we need a new SSL access certificate.

For each connection (via https) to the AIS service, the subscriber generates a self-signed SSL client certificate with a key length of at least 3072 bits for authentication to the AIS service and transmits the certificate to Swisscom in advance.

The structure of the certificate is as follows:

- Content of "subject" i.e. "distinguished name" of the certificate:
  - CN=< URL of the subscriber system that communicates with AIS >
  - emailAddress=< E-mail address of the contact person for this connection >
  - O=< name of the organization >
  - C=< country in which the organisation is based >

The validity may not exceed 90 days. There are no specific requirements for the key uses. Please mark your choice:

- ☐ The certificate has already been generated and is sent along with this application.
- ☐ The certificate will be forwarded to [sts.salessupport@swisscom.com](mailto:sts.salessupport@swisscom.com) with reference to this application.

**3 Contact data of the subscriber****3.1 Subscriber's address**

Company name / organization name

Address

Postcode / Place

**3.2 Technical main contact of the subscriber**

First name, last name

Address

Phone number

Mobile number

E-Mail

**4 Test access**

After submitting this form to our fulfilment [sts.salessupport@swisscom.com](mailto:sts.salessupport@swisscom.com) you will receive a confirmation with the renewed test access (within 2 weeks). From then on you can use it until your access expires (90 days).
