

Application for Prolongation (90 days) of existing Test Account All-in Signing Service

1 Purpose of the document

This document serves as an information and application form for a prolongation of an existing test account for Swisscom's All-In Signing Service.

2 Access requirements: SSL access certificate

For the new test period we need a new SSL access certificate.

For each connection (via https) to the AIS service, the subscriber generates a self-signed SSL client certificate with a key length of at least 2048 bits for authentication to the AIS service and transmits the certificate to Swisscom in advance.

The structure of the certificate is as follows:

- Content of "subject" i.e. "distinguished name" of the certificate:
 - CN=< URL of the subscriber system that communicates with AIS >
 - emailAddress=< E-mail address of the contact person for this connection >
 - O=< name of the organization >
 - C=< country in which the organisation is based >

The validity may not exceed 90 days. There are no specific requirements for the key uses. Please mark your choice:

- The certificate has already been generated and is sent along with this application.
- The certificate will be forwarded to MSC.support@swisscom.com with reference to this application.

3 Contact data of the subscriber

3.1 Subscriber's address

Company name / organization name

Address

Postcode / Place

3.2 Technical main contact of the subscriber

First name, last name

Address

Phone number

Mobile number

E-Mail

4 Test access

After submitting this form to our fulfilment MSC.support@swisscom.com you will receive a confirmation with the renewed test access (within 2 weeks). From then on you can use it until your access expires (90 days).
