

Ongoing digitisation and the individuality of customer needs require a deep understanding of and specialist knowledge in various IT disciplines. To be able to respond to as many needs and technologies as possible, partnerships with specialised companies are essential.

One contact for your various ICT needs

What do the 3rd Party Services from Swisscom offer?

Thanks to cooperation with specialised partners, we can provide you with expert knowledge in various IT disciplines. We expand our service portfolio by using 3rd Party Services, so-called ISVs (independent software vendors), and actively offer their solutions on the market. Potential partners are subjected to a careful selection process to ensure they meet the requirements of our customers. With this service we can address every ICT requirement.

Our partners design, implement and operate the solution. We ensure that contract creation and invoicing is done for you with a minimum amount of effort.

Your advantages with Swisscom 3rd Party Services

- **Ability to react to market and customer requirements**
Thanks to cooperation with specialised partners, we can respond to changing needs and technologies.
- **Free choice of supplier**
We take your wishes into consideration and work with the suppliers that best suit your needs.
- **Simple supplier management**
We bring you together with the right partner and focus on the contractual and invoicing formalities.
- **Swisscom as a one-stop shop**
We are your only contracting party for countless ICT solutions.
