

PDF-based E-Invoicing by Conextrade

Simple and cost-effective dispatch of VAT-compliant PDF invoices by e-mail

Paper invoices involve a great deal of work and expense for companies. Printing, paper and postage generate high costs.

With its PDF-based E-Invoicing service, Conextrade offers companies a cost-effective solution for sending electronic VAT-compliant invoices in Switzerland and internationally.

How PDF-based E-Invoicing works:

- The invoicing party sends the PDF files to Conextrade over a technical interface
- Conextrade creates the e-mails in accordance with the invoicing party's specifications and signs the PDF invoices. This takes place for Swiss VAT compliance purposes and for all countries where signed PDF invoices are legally permissible
- The signed PDF invoices are forwarded to the invoice recipient with a signed e-mail (companies and private individuals)
- The e-mail signature authenticates the sender and guarantees that the content has not been changed during transfer (phishing)

Benefits and advantages

- > Simple dispatch of PDF invoices
- > Almost all invoice recipients (B2B/B2C) can be reached with this service.
- > Cost optimisation compared to paper invoices: Printing, paper and postage costs no longer apply
- > Legal certainty in Switzerland and internationally: The digital signature on all electronic invoices and e-mails to customers guarantees the required conformity at all times.
- > The service can also be used to send reminders
- > Disposing with the use of paper makes a significant contribution to protecting the environment
- > E-mail signature to guard against phishing: The e-mail signature authenticates the sender and guarantees that the content has not been changed during transfer
- > Ideal as a complementary product to E-Invoicing
