

There is increasing demand for SAP systems to be flexible, agile and, at the same time, highly available. Meanwhile, the Azure Cloud is opening up new opportunities and possibilities. Our assessment will help you to understand your SAP system landscape better and get the most out of it in the Azure Cloud.

Our SAP Assessment for Azure will provide you with the overview of your SAP systems that you need in order to make better decisions on how to reduce your costs and make improvements.

What does the SAP Assessment for Azure include?

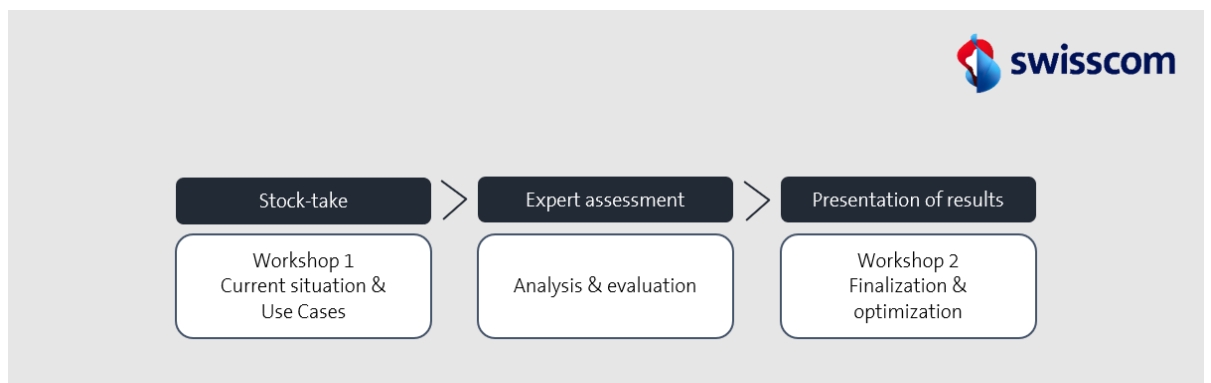

Over recent years, your SAP system landscape has been growing and its footprint has become bigger and bigger. Our assessment will help you to organise your entire SAP environment in order to work out the most economical and sustainable configuration and find the ideal sizing for your SAP systems.

With the SAP Assessment for Microsoft Azure, we will examine your individual situation in detail and help you develop a target architecture for your SAP systems that will also show you the latest S/4HANA possibilities on Microsoft Azure. You will receive a report on the potential and a roadmap for the implementation of your SAP solution in the Microsoft Azure Cloud.

Your benefits with the SAP Assessment for Azure by Swisscom

- **Use case definition**

swisscom

Facts & Figures

Assessment duration and cost

Duration: 5 days, comprising

- ½-day stock-take workshop with definition of scope, at your premises or online
- 2½-day expert assessment; preparation of customer-specific results
- 1-day presentation by Swisscom, at your premises or online
- 1-day workshop follow-up and final presentation by Swisscom, at your premises or online

Cost: CHF 9'800, including an Azure CSP subscription with a CHF 250 allowance for three calendar months.

Basic assessment process

Stock-take

We examine your current situation and business requirements, and define use cases and the scope of the assessment together.

Expert assessment

Swisscom conducts a rough assessment of your current situation based on one or two core system landscapes and discusses your requirements and use cases with the experts. The concept is then devised on the basis of the data collected during the stock-take.

Presentation of results

Presentation of Swisscom's expert evaluation:

- Principles of SAP on Azure
- Presentation of the possibilities and versions of SAP on Azure incl. possible SLAs
- Management of the SAP on Azure systems
- Rough analysis of current landscape
- Presentation of one or two versions based on one or two core system landscapes, e.g. ERP/BW
- Rough cost estimate for the two core landscapes
- Potential of SAP on Azure in relation to the current landscape
- Migration of current landscape to Microsoft Azure

Azure subscription

If you do not yet have an Azure subscription, you will receive an Azure CSP subscription (CHF 250 allowance for three calendar months) as part of the assessment.

Optional services

We'll help you with your projects, from concept to implementation to operation.

We'll carry out proofs of concept and technological tests adapted to your requirements.

We'll help you develop SAP solutions on Azure.
