

The future is running your applications in the cloud? You want to modernise your application landscape and benefit from an increased operational efficiency and improved agility? Our Application Readiness Assessment is the beginning of your journey.

During our assessment, we will analyse your application landscape and start the journey together. We evaluate the readiness of your application and business requirements to identify your path to the cloud. At the end of the assessment, you will be presented with a tailored roadmap of your application modernisation journey. Be ready to start the refactor, rehost, rearchitect or rebuild process of your applications.

What does the Application Readiness Assessment include?

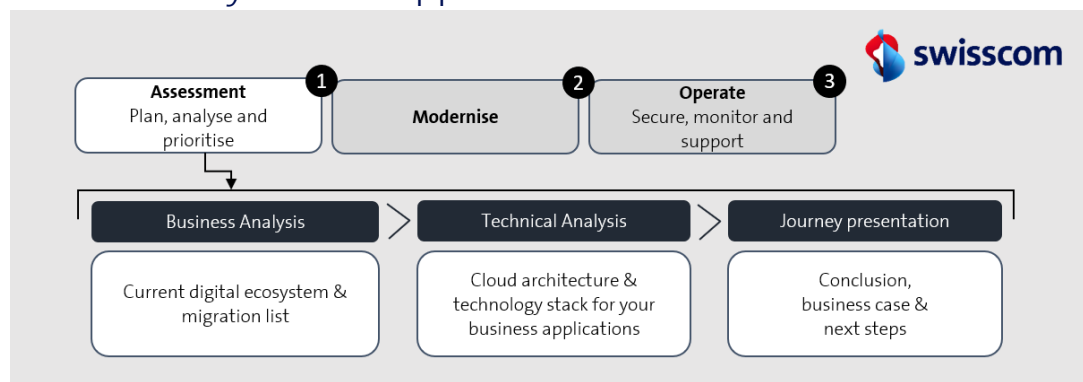

Our Application Readiness Assessment is designed to deliver your personalised modernisation strategy. Jointly, we analyse the state and health of your current applications and systems, aggregate your futures needs and visions and define the best path to the cloud by rehosting, refactoring, rearchitecting or rebuilding your applications. Our analyses will fully consider data security aspect to fit your confidentiality policy based on your data classification. We then define the feasibility and the individual steps up to modernisation, including forecasts of your return on investment. Throughout this assessment, you will rely on our expertise, advice and best practice approach. With the help of our experts, defining priorities, evaluate technical complexity and business processes has never been so clear and helpful.

Your benefits with the Application Modernisation Readiness Assessment by Swisscom

- Know your cloud readiness level
Learn the maturity of selected applications from your digital landscape and understand what needs to be done before you can migrate them successfully to the cloud.
- Get an overall perspective
Our assessment will analyse your situation from both a technical and a business perspective.
- Benefit from best practices
Profit from our best practice approach as a leader and Microsoft Gold Partner who is successfully developing and managing client specific applications.
- Leverage a wide partner network
Use our local expertise and global reach as your competitive advantage.
- Be ready for your cloud deployment
Profit from a technical assessment, an actionable roadmap, and a business case. You will be consequently well prepared to modernise and migrate your application landscape to the cloud.

The Application Readiness Assessment is fully included in our application modernisation service offering, which includes migration, modernisation and lifecycle management of cloud applications.

How we carry out the Application Readiness Assessment

Facts & Figures

Duration and cost

Duration: 5 days, comprising of:

- Kick-off and definition of detailed assessment scope: align on which custom applications to assess based on your business priorities and application dependencies
- Workshop with your business key stakeholders at your premises or online
- Analysis of your current situation, assessment of your applications, options for the migration, and presentation of your tailored journey

Cost: CHF 9'800, including an Azure CSP subscription with a CHF 250 allowance for three calendar months.

Process

Business Analysis

Digital landscape inventory workshop with related interviews, we analyse the current digital ecosystem in order to understand the ICT applications strategy and digital roadmap (short and mid-term) to define together a prioritised list of candidate applications for migration.

Technical Analysis

In the technical part we will take a deep dive into the architecture of prioritised, tailor-made business applications. They will specify the target Cloud architecture and define actions to be completed to enable the migration. A suitable cloud architecture as well as a technology stack for the selected customised business applications will be considered.

Presentation of your tailored journey

Together with your expert group we present your journey including validation of your key stakeholders as a baseline for next steps. Additionally, we deliver a high-level business case with effort estimates and costing for Application Modernisation.

Azure subscription

If you do not yet have a Microsoft Azure subscription, you will receive an Azure CSP subscription (CHF 250 allowance for three calendar months) as part of the assessment.

Additional services

Consulting

- Customer specific requirement engineering and consulting based on your claim
- Conduct change management to get users on board including training of operational teams

Development

- Implement your migration and modernisation strategy (rehosting, refactoring, rearchitecting or rebuilding) including proof of concepts and BluePrints
- We deliver custom software from scratch as well as citizen developed solutions
- Best of both worlds: On-Demand Software factory in Switzerland and Offshore

Operation

- Deliver and configure Agile Tools and DevOps processes
- Application Maintenance & Lifecycle
- Offer several support levels including monitoring of Azure Infrastructure

With our portfolio, we pursue a holistic approach. In addition to Professional Services, Managed Services and our Reselling+ portfolio, we are also your partner for Microsoft 365 and Dynamics 365. This assessment is brought to you in partnership with our subsidiary Swisscom Digital Technology Ltd. Learn more at www.swisscom.ch/azure.
