

DCS

Proof of Concept

Swisscom's Proof of Concept service enables customers to test dynamic cloud services (DCS) for their specific use cases. Instant, free access to the DCS infrastructure gives customers the basis to configure their individual architecture solution according to their needs and to test it in a real environment.

Target group

SMEs

Place

Remote

Fees

Free use of the infrastructure during the predefined test phase

Service components

Depending on various factors, customers are accompanied and supported in one or more PoC phases.

- Instant and free use of the infrastructure, including operating system licensing
- Additional licences available from Swisscom for an extra charge
- Personal advice and support
- Availability of professional services (for an extra charge)

Benefits for customers

- Direct access to the DCS infrastructure via dashboard
- Usage and testing according to your requirements – tailored to your solutions business
- Review of your requirements (architecture, connectivity, performance, costs, etc.)
- Professional advice on your test objectives
- Support in German, French, Italian or English
