

As increasing numbers of applications move to the cloud, companies are facing important questions about the protection and security of their critical and sensitive data.

Cloud Data Privacy provides you with a simple and secure encryption solution that keeps you in control of data stored in the cloud.

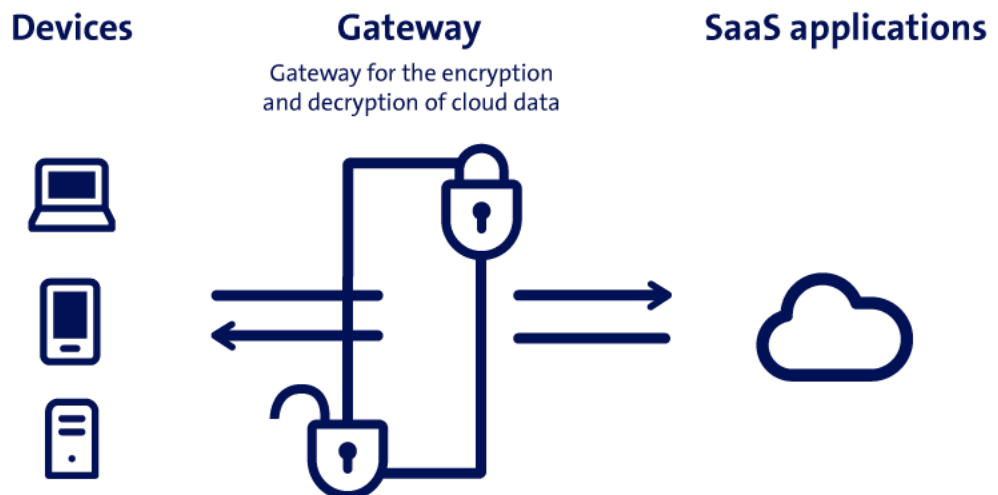

What is Cloud Data Privacy?

A cloud data protection solution that encrypts and/or tokenizes data before it is transferred to the cloud. The solution acts as a gateway that switches between users and their cloud applications and performs encryption/tokenization in the background. No manual interaction with the gateway is required. The data is encrypted transparently while retaining the core functions of your applications (such as search and sorting). The masked (encrypted or tokenized) data can thus be stored in a cloud-based SaaS solution such as Microsoft 365 or Salesforce under observance of compliance and data protection requirements.

Benefits of Cloud Data Privacy

- Protects sensitive data. Data only leaves the company in encrypted form.
- Permits secure cloud usage by allowing you to specify which data should be encrypted and/or tokenized and which should remain unchanged.
- Facilitates compliance with regulatory requirements such as the Swiss Data Protection Act and GDPR, as well as regulations for the financial and healthcare industries and the public sector.
- Suitable for SaaS applications such as Microsoft 365 (SharePoint, OneDrive for Business, Exchange, Teams) and Salesforce.
- You are responsible for cloud tenant management, giving you complete control over the encryption keys.

How Cloud Data Privacy works

Facts & Figures

The **Cloud Data Privacy service** enables the encryption of sensitive data in the following applications: Microsoft Exchange, SharePoint, OneDrive, Teams and Salesforce.

Basic services

Project services for rollout of the solution.

Monthly billing depends on the number of users and applications.

Consulting, customising and **changes** (time & material) during operation.

Optional services

The information in this document does not constitute a binding offer. It is subject to revision at any time.
