

Azure from Swisscom

The Microsoft® Cloud flexibly adjusts to your company and your requirements – Swisscom brings the cloud to your company.

With digitisation, companies have to update their products more and more quickly and position them on the market immediately. Your information technology must be able to handle this complexity. With Azure, the cloud platform from Microsoft®, companies of all sizes can run their IT either partially or completely in the hybrid cloud. Your information technology becomes more agile, more flexible, faster and cheaper, and is completely secure.

What is Azure from Swisscom?

Swisscom is your partner – we bring the cloud to your company. With more than 200 certified Microsoft® engineers (MCP) and security consultants, Swisscom is the largest Microsoft® system integrator and cloud solution provider partner in Switzerland. Our specialists work with you to design your future cloud environment and support you in the digitisation process with in-depth expert knowledge, enabling you to embark on your journey to the cloud without any stress.

Your benefits

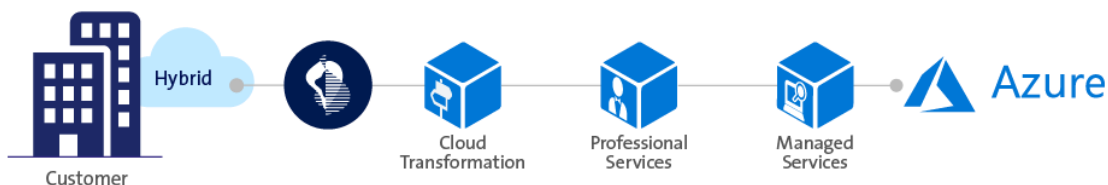

With Azure from Swisscom

- > you benefit from our specialist knowledge in Azure and Azure Stack
- > you keep your IT costs under control – usage-based billing on your Swisscom invoice is guaranteed
- > you can adapt services within minutes
- > you can acquire the platform to make software developments using Microsoft® technology
- > you have local support from Swisscom
- > you can concentrate on your core business activities and leave Swisscom to manage your infrastructure and applications

For customers who for performance and security reasons do not want to trust the internet for their connection to the cloud, Swisscom additionally provides an MPLS network connection directly to the Microsoft data centres via the Azure ExpressRoute service.

We work with you in preparing the path to the cloud, from the analysis phase to implementation and active use – all from a single source. We answer your questions from A to Z and take care of your needs.

Step-by-step into the cloud.

What we offer

Three modules from Swisscom for your path to the Azure Cloud

| | |
|--|--|
| Cloud Transformation Starter Kit | <p>You get an overview of Azure and get useful information for your path to the cloud. You find out more in a workshop run by Swisscom specialists. The content of a workshop:</p> <ul style="list-style-type: none">> General information on Cloud Services> Overview of the Azure technology (IaaS, PaaS, SaaS) and the comprehensive Azure service portfolio> Information and challenges in the migration and transformation of your infrastructure and services to the cloud> Security aspects of Cloud Services> First price indications of Cloud Services |
| Professional Services Solution Design | <p>Based on your demands and needs, our Azure-certified specialists support you in architecture design and migration/transformation concepts:</p> <ul style="list-style-type: none">> Defining the cloud strategy and goals> Analysis and assessment of the existing services> Preparation of the target architecture incl. optimised network connection and migration procedure. What can be ported or has to be set up from scratch in the cloud. Lift & Shift versus Rebuild.> Security and risk analysis for using Cloud Services> Data management and optimisation. Which data should be stored where. Availability, security and cost aspects> Checking and documenting the solution design> Calculating and verifying the costs and the saving opportunities |
| Professional Services Migration & Integration Services | <p>Experienced, certified specialists support you with the migration and integration of your services into the Azure cloud:</p> <ul style="list-style-type: none">> Preparing and verifying the target architecture> Checking the architecture concepts and migration plans, e.g. via PoC (Proof of Concepts)> Migration and integration support> Support for project management, documentation and concepts |
| Professional Services Expert Services | <p>Are you already using Azure services? Our specialists support and advise you on all topics relating to:</p> <ul style="list-style-type: none">> Automation and optimisation> IaaS and PaaS service extensions> Security, Big Data & IoT, Artificial Intelligence etc.> Rebuild and redesign applications for using the cloud |
| Managed Services | <p>Concentrate on your core business activities and leave Swisscom to manage your infrastructure and applications.</p> <p><i>Further details can be found in the "Managed Services" factsheet</i></p> |

Joining the digital future with Swisscom

Visionary companies exploit the opportunities of digitalisation to re-invent the future. Swisscom is also opening up new areas of business with its numerous innovations. We see it as our mission to support you in exploiting digitisation for your own benefit in the best way possible.

We provide top network infrastructure, secure data storage, reliable project management, successful implementation and a whole host of innovative solutions, all for you.

Welcome to the country of possibilities.
