

Four Pillars of a Great Azure Architecture by Swisscom

We review your Azure architecture and optimise it if necessary on the basis of our best practices.

We optimise your Azure architecture

More and more companies are moving their applications and data to the cloud in order to take advantage of the benefits it offers. They start by migrating individual workloads and continue adding more over time. This growth, however, also increases the complexity of their IT environment in the cloud. The original goals are often not fully achieved and it becomes increasingly difficult for customers to assess the cost/benefit of the cloud services used.

Using key principles throughout your architecture can help you continuously improve your architecture. We can help you with our Architecture Review. If required, we can also handle the implementation of best practices for you.

What is an Azure Architecture Review?

A certified Azure Cloud architect from Swisscom will conduct the review for you and assess your Azure architecture based on four pillars (see chart). In the final report, we'll give you an insight into its current status and any potential risks posed by the Azure architecture examined.

We will also provide you with concrete optimisation and risk reduction measures. If required, we'll be happy to help you implement the recommended changes.

How you can benefit from our Architecture Review:

- **Analysis:** get an analysis of your Azure architecture based on Azure best practices
- **Benchmark analysis:** get an up-to-date overview of the potential and risks of your Azure architecture
- **Recommendations:** receive a detailed report with concrete recommendations and measures to improve your Azure architecture
- **Implementation:** get professional support from our certified Azure architects to optimise your Azure architecture and close gaps
- **Key principles:** gain a competitive edge over your rivals with a continuously optimised Azure architecture and additional services tailored to your business

The four pillars of our Azure Architecture Review

Efficiency & operation

Efficient operation and optimal use of IT resources

Security

Protection of information, systems and resources

Availability & reliability

Prevent or recover quickly from outages

Performance & scalability

Optimal utilisation and scaling of IT resources

Facts & Figures

 Basic services	<p>Half-day Azure Architecture Review led by a Swisscom Azure Cloud architect.</p> <hr/> <p>You will receive a report with concrete measures to optimise and reduce the risks posed by your architecture.</p>
 Optional services	<p>Hire Swisscom to implement the changes (based on a separate assignment).</p> <p>The basic services can also be combined with the following:</p> <h3>Your Journey to the Azure Cloud</h3>  <p>Costs Flat fee of CHF 1,900</p>

We take a holistic approach with our portfolio. In addition to Professional Services, Managed Services and our Re-selling+ portfolio, we are your partner for Office 365 and Dynamics. Find out more at www.swisscom.ch/azure.
