

# Managed Cloud Foundation from Swisscom

## Lay a secure foundation for your cloud

Managed Cloud Foundation from Swisscom

### Create a solid foundation

Cloud platforms are handling ever-increasing workloads, resulting in more complexity and risk. This makes it even more important that stakeholders in internal business processes comply with central IT requirements while retaining the benefits of cloud solutions, such as scaling and fast time-to-market. Swisscom's Cloud Foundation helps customers to successfully master the balancing act between specifications and the flexibility made possible by cloud solutions.

#### What is the Cloud Foundation from Swisscom?

Based on our experience and know-how, we have developed good practices for a solid cloud foundation. These enable modern companies to migrate smoothly and make comprehensive use of the cloud without having to take unnecessary risks.

This is also our approach for the Cloud Foundation; it is implemented by our experienced cloud experts in two phases:

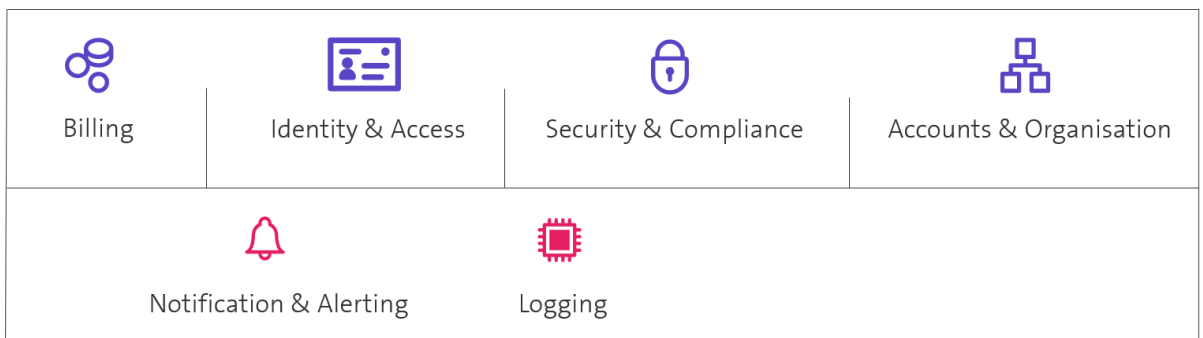

The first phase entails implementing the cloud foundation and tailoring to individual customer requirements.

In the second phase we take over the solution and ensure the smooth operation.

#### How you can benefit from Cloud Foundation

- **Know-how and good practices:** Benefit from our good practices and get access to our team of experts
- **Implementation:** Our cloud architects implement the Cloud Foundation for our customers.
- **Operation and ongoing optimisation:** Swisscom ensures smooth operation of the Cloud Foundation. The customer thus benefits from continuous improvements.
