

Flexible working is the cornerstone of new forms of employment. This means that employees need to be mobile and able to work on the move. Increased efficiency, greater flexibility, a higher level of employee satisfaction and a lower energy footprint are just a handful of reasons why companies hold mobility in high regard.

The new world of mobility: solutions tailored to your mobile communications thanks to NATEL® go.

What is NATEL® go?

NATEL® go subscriptions are flat-rate subscriptions for business customers and include voice, SMS and data. Your employees are no longer restricted when using mobile devices such as smartphones and tab-lets. NATEL® go also offers a new experience. Advanced Calling allows you to experience the highest level of telephony. You can now also use multiple SIM cards per subscription for additional devices in parallel for Voice and Data at the same time, thanks to the Multi Device option. With NATEL® go, unforeseeable costs are consigned to the history books. The same is true for unexpectedly high fees.

Your benefits with NATEL® go

- Tailor-made to individual requirements
You'll find a suitable subscription regardless of your communication needs. Manage mobile subscriptions and options directly and conveniently in the Business Center.
- The highest standard of telephony
Firm pools enable you to always keep costs under control, even if your requirements change. You can set a cost limit for each user group. Additional costs incurred will be billed to your employees via a private invoice. Easily retrieve detailed billing information online.
- The highest standard of telephony
NATEL® go enables you to make calls using mit VoLTE (Voice over LTE) or a WLAN network. Use up to five SIM cards per subscription for additional devices, with parallel ringing available on all devices.

NATEL® go flat-rate subscriptions at a glance

Global experience 			Swiss experience 		Voice experience 	
Global Switzerland, EU, Western Europe + top business countries	Europe Switzerland + EU and Western Europe	Neighbours Switzerland + neighbouring countries	Swiss premium	Swiss standard	Swiss voice ²	Company voice ²
Unlimited phone calls, SMS & mobile data depending on subscription zone ¹			Switzerland (Incl. Principality of Liechtenstein)		Switzerland (Incl. Principality of Liechtenstein)	
High-speed			Unlimited phone calls, SMS & mobile data in Switzerland		Unlimited phone calls & SMS	Unlimited phone calls within the company
Multi-device (use several devices with one subscription at the same time)			High-speed	200/100 Mbps	200/100 Mbps	
			Multi-device		Not available	

1 Data roaming: Unlimited and with maximum subscription speed for practically all users | Includes unlimited mobile data, SMS/MMS and phone calls abroad at no extra cost. Data transmission speed abroad is reduced to 0.2 Mbps (download) and 0.1 Mbps (upload) with usage in excess of 40 GB per month, which is still sufficient for using your e-mail and calendar app and for surfing the web.

2 The "Data Option start" version is available for subscriptions without data allowances: + 500 MB data allowance for minimal mobile data requirements (can be used a maximum of twice).

swisscom

Facts & Figures

Basic services

Business Center: manage company policies, e.g. cost limits and roaming settings, in real time, en masse, and in a standardised and simultaneously customised way.

Billing & Analytics S: quickly and simply check invoices and invoice items at any time and place.

eSIM: use the latest and most innovative devices with an eSIM. NATEL® go supports eSIM for main and additional devices (multi-device).

COMBOX® pro: the mobile telephone answering machine with a host of additional features.

PWLAN: use of over 1,700 Swisscom Hotspots (at train stations, airports, etc.) is included as part of the data volume available. Communication via network detection is included in the case of subscriptions with inclusive volumes.

Number suppression: telephone numbers are not displayed for outgoing calls.

Authorisation profiles: assign pre-defined authorisation profiles (e.g. cost limits, roaming settings, etc.) to end users.

Short numbers: private numbering plan

Blocking sets: blocking calls to chargeable telephone numbers (e.g. 0900 or 0901 numbers, etc.), blocking incoming and outgoing connections while travelling (roaming), Blocking calls to international telephone numbers.

SMS roaming info: roaming info provides you with in-depth information on tariffs if you cross national borders.

Itemised billing: make use of three different versions of itemised billing: standard, anonymised or capped.

Options

Data start: this option is available for subscriptions without data-inclusive volumes. +500 MB inclusive volume for minimal mobile data requirements (limited to being used twice).

Alternative telephone number: externally display an alternative telephone number when making outgoing calls to always forward calls to the right place.

Multi Device: with this option, you can use up to five additional devices in parallel with all flat-rate subscription types.

Fringe benefit: conveniently split mobile costs between business and private costs.

Supplementary services

Billing & Analytics: lets you check and analyse itemised statements. Export and forward them as often as you like. You receive cost and usage data in prepared dashboards – everything at a glance and available all the time. Targeted analyses via automated reports help you keep cost and usage data under control.

Device as a Service: let us manage your devices, from acquisition and inventory to the replacement service, via guarantee and repair management.

Enterprise Mobility Management: protect your company's data on PC as well as on mobile devices such as smartphones and tablets.

Mobility for Work: let us manage your employees' subscriptions and devices. We will provide employee support (online, over the phone or in person at Swisscom Shops).

Professional Voice: with Professional Voice, you can communicate with your COMBOX® completely in accordance with your CD specifications and therefore organise each one of your telephone answering machines.

Mobile Voice Recording: record your incoming and outgoing mobile calls.

Mobile Data Recording: record the information about all your call and SMS connections as well as SMS communication behavior.
