

The demands on your ICT environment are constantly growing and becoming noticeably more complex. It's therefore time to have your ICT environment put through its paces by our experts.

We will analyse your ICT environment, draw up a comprehensive inventory, identify potential improvements and uncover any risks. You can concentrate on your core business and simply leave it to us to suggest some practical solutions.

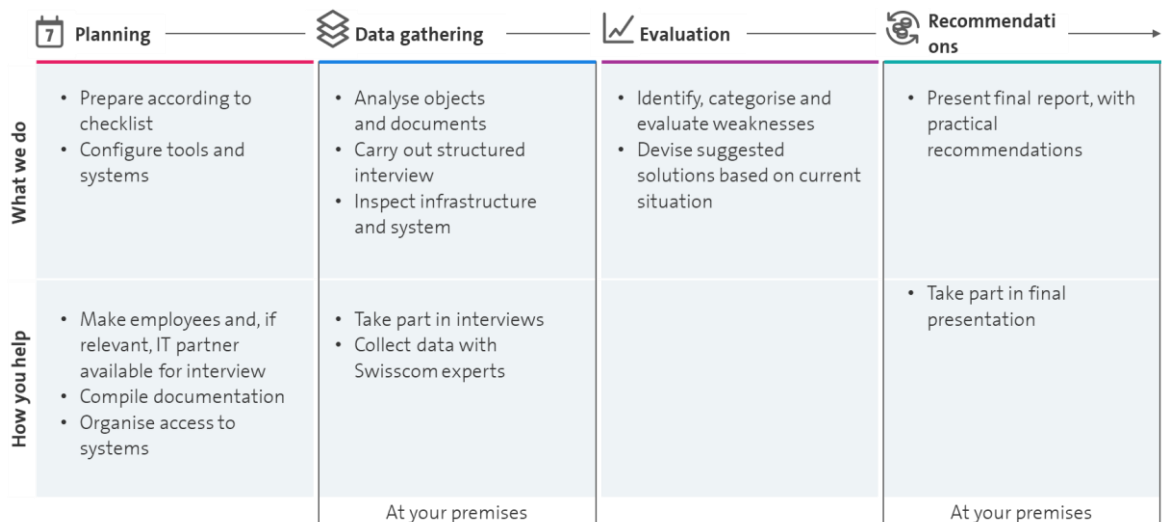

What is the ICT Assessment for SMEs?

The ICT Assessment analyses your technology, infrastructure, security, regulatory systems, authorisations and licences. Our experts will provide you with a personalized evaluation of your current situation as well as some suggested solutions with practical recommendations.

Your benefits with the ICT Assessment for SMEs

- Independent, thorough evaluation
You will discover how mature your company's ICT environment is in a detailed final report that you can use as a decision-making tool. You can determine the scope of the evaluation process yourself.
- Personal support from experts
From the assessment itself to the implementation of the resulting recommendations, experts with many years' experience will assist you. You can therefore benefit from specialist knowledge without the need to recruit additional staff.
- Decision-making tool for optimising your ICT infrastructure
Our detailed final report will show you how you can enhance and simplify your ICT infrastructure.

How we carry out the assessment
